Abstract: The information collection includes closed-ended and open-ended responses to questions about forest restoration across the Hawaiian Islands, solicited from self-identified restoration practitioners, through an online survey (approximately 70–100 respondents) and semi-structured interviews (20–40 participants). The objective of this effort is to gather information and identify emergent themes and patterns drawn from personal perspectives and narratives not otherwise captured in ecologically-focused studies. This will aid researchers in identifying ways to improve the effectiveness and scaling up of forest restoration efforts in alignment with broadly stated ecosystem restoration goals of local NGOs to state, federal, and inter-governmental organizations.

Abstract: The BLM is required to manage commercial, competitive and organized group recreational uses of the public lands, and individual use of special areas. The BLM must assess, evaluate and authorize (permit) activities proposed to be conducted on public land. The estimated annual burden is estimated to increase by 308 hours (from 5,292 to 5,600). This increase in burden hours results from increasing the number of estimated annual responses from 1,323 to 1,400. The increase in the number of responses is a result of increase demand for recreation permits. This OMB Control Number is currently scheduled to expire on April 30, 2023. The BLM plans to

request that OMB renew this OMB Control Number for an additional three years.
