SUPPLEMENTARY INFORMATION:

I. Background

The FDA Reauthorization Act of 2017 (FDARA) (Pub. L. 115-52) directs FDA to establish a category of over-the-counter (OTC) hearing aids through rulemaking, and mandates that FDA establish various requirements for this category of devices. Published elsewhere in this edition of the **Federal Register**, FDA is issuing a final rule (“rule”) to establish the OTC category of hearing aids and to implement the requirements of FDARA. In the rule, FDA has also outlined multiple related changes to the overall regulatory framework for hearing aids to harmonize existing regulations with the new OTC category while continuing to

provide a reasonable assurance of safety and effectiveness.

FDARA also directed FDA to update and finalize the draft guidance entitled “Regulatory Requirements for Hearing Aid Devices and Personal Sound Amplification Products,” issued on November 7, 2013. To fulfill this requirement of FDARA, FDA is issuing this final guidance, which supersedes the February 25, 2009, final guidance. This final guidance reflects the new regulatory framework for hearing aids in the rule.

This guidance document identifies current applicable legal requirements under the Federal Food, Drug, and Cosmetic Act for hearing aids and for PSAPs. This guidance is intended to describe hearing aids, PSAPs, their respective intended uses, and the regulatory requirements that apply to both types of products. For information on certain situations in which FDA does not intend to enforce certain regulatory requirements, you may refer to the preamble to the rule that is published elsewhere in this edition of the **Federal Register**.

A notice of availability of the draft guidance appeared in the **Federal Register** of October 20, 2021 (86 FR 58192). FDA considered comments received and revised the guidance as appropriate in response to the comments, including aligning the guidance with the rule.

This guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on “Regulatory Requirements for Hearing Aid Devices and Personal Sound Amplification Products.” It does not establish any rights for any person and is not binding on FDA or the public. You can use an

alternative approach if it satisfies the requirements of the applicable statutes and regulations.
