Needs and Uses: The aim of this study is to assist in the adaptation of an existing web-based sexual assault prevention program for college men and women, for use among the Navy population. To achieve this aim, data will be collected in several ways and respondents will participate in only one type of data collection. First, responses to a normative survey will provide information about the behavior and attitudes of Sailors regarding alcohol use and sexual assault. Next, focus groups and interviews will be conducted to obtain feedback about the content of the intervention and ways to adapt it for Sailors. Interviewees and focus group respondents will be selected based on their drinking habits, which will be determined by a brief pre-interview/focus group survey. All data are anonymous, meaning that there is no way for us to match any personally identifiable information of any participant to their survey responses. After interview/focus group completion, a post-interview/focus group survey will be given to obtain non-personally-identifiable demographic and alcohol use information to be used as descriptive information, as well as data from standardized measures that assess respondents' opinions of the existing intervention. All surveys will be completed via a HIPAA compliant software. Data from these surveys will be incorporated into the intervention*

content and will help generate an adapted prototype of the sexual assault prevention program (+Change) for Sailors.

The results of these surveys will impact the Department of the Navy by documenting the feasibility, acceptability, satisfaction, and utility of a multi-pronged, individually tailored, and easily distributed prevention program that addresses the large problem of sexual assault, and the associated effects of alcohol for Sailors. In the long-term, this research benefits the readiness of the force by producing an easily disseminated high-quality sexual assault prevention program that can be implemented in multiple military settings and sustain evaluation in a larger clinical trial. This research can also have a secondary impact on reducing hazardous alcohol use among service members and can prevent the occurrence of alcohol use problems and associated negative health sequelae in service members. These long-term objectives are consistent with both DoD and the national public health priorities.

Affected Public: Individuals or households.

Frequency: Once per respondent.

Respondent's Obligation: Voluntary.

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The Hawkins Program, authorized under Part B of

Title II of the Higher Education Act of 1965, as amended (HEA) is designed to support centers of excellence at institutions of higher education (IHEs). The selected centers of excellence must be established at Historically Black Colleges and Universities (HBCUs); Tribal Colleges or Universities (TCUs); or Minority Serving Institutions (MSIs), such as Hispanic-Serving Institutions (HSIs), with a State-accredited teacher preparation program, to help increase and retain the number of well-prepared teachers from diverse backgrounds, resulting in a more diverse teacher workforce prepared to teach in our Nation's low performing elementary and secondary schools and close achievement gaps.¹ This program focuses on the various aspects of the teacher preparation pipeline, including the recruitment, preparation, support, placement, and retention of teachers for and in high-need local education agencies (LEAs) to support underserved students. Through this program, the Secretary seeks to fund applicants that propose to incorporate evidence-based components and practices into their teacher preparation program.

Background: The FY 2022 Consolidated Appropriations Act provides \$8 million in first-time funding for the Hawkins Program to diversify the teacher workforce, including supporting teaching assistant initiatives at HBCUs, TCUs, and MSIs that have partnerships with high-need LEAs.

The Hawkins Program is particularly well-positioned to advance equity in our education system by increasing the access of teacher candidates, including teacher candidates of color, to comprehensive programs that will support them in developing the knowledge and skills they need to positively impact student achievement and outcomes. There is significant inequity in students' access to well-qualified, experienced, and effective teachers,² particularly for students from low-income backgrounds, students of color, children or students with disabilities, and English learners (ELs).

Although HBCUs, TCUs, and MSIs confer just over 12 percent of all bachelor's degrees in education, these institutions account for over 40 percent
