II. Discussion

The NRC is issuing for public comment the draft FONSI and accompanying draft Supplement to the NRC staff’s EA for the license renewal of CBR’s ISR facility. The draft Supplement describes the NRC staff’s efforts to address the deficiencies identified in the Atomic Safety and Licensing Board’s partial initial decision (LBP–16–7), which found that the NRC staff did not meet its identification obligations under the National Historic Preservation Act (NHPA) and was deficient under the National Environmental Policy Act (NEPA) “for failing to take a hard look at potential TCPs [traditional cultural properties] within the Crow Butte license area[.]” Specifically, the Supplement describes the methodology, implementation, and results of the 2021 tribal cultural survey to identify sites of significance to the Oglala Sioux Tribe. It also documents the NRC staff’s evaluation of the identified sites according to the criteria for listing in the National Register of Historic Places (NRHP) and the NRC staff’s assessment of potential impacts of the license renewal on the identified sites under the NHPA (for sites eligible for the NRHP) or NEPA (for other sites of significance to the Tribe). Based on these evaluations in the EA Supplement, the NRC staff preliminarily concludes that there will be no significant impacts to cultural resources identified during the 2021 tribal cultural survey. Accordingly, based on the 2014 EA and the draft EA Supplement, the staff has preliminarily concluded that an environmental impact statement is not necessary and a FONSI remains appropriate.

III. Draft Finding of No Significant Impact

Based on its review of the proposed action, in accordance with the requirements in part 51 of title 10 of the *Code of Federal Regulations* (10 CFR), “Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions,” the NRC staff has preliminarily concluded that the

proposed action, renewal of NRC Source Materials License No. SUA–1534 for CBR’s ISR facility located in Crawford, Nebraska, will not have a significant impact on the cultural resources discussed in the EA Supplement and will not significantly affect the quality of the human environment. Therefore, the NRC staff has preliminarily determined, pursuant to 10 CFR 51.31, that preparation of an environmental impact statement is not required for the proposed action and a FONSI is appropriate.

II. Discussion

HDI has the authority to conduct licensed activities under Renewed Facility Operating License No. DPR 20 for Palisades and the general license for the Palisades independent spent fuel storage installation. These licenses provide, among other things, that the respective facilities are subject to all rules, regulations, and orders of the NRC now or hereafter in effect. Palisades is a pressurized-water reactor located in Covert, Michigan, in Van Buren County, that is permanently shut down.

On December 23, 2020, HDI submitted to the NRC the PSDAR for Palisades, contingent upon the transfer of the Palisades license to HDI. Paragraph 50.82(a)(4)(i) of title 10 of the *Code of Federal Regulations* (10 CFR), “Termination of license,” states that a PSDAR must contain a description of the planned decommissioning activities along with a schedule for their accomplishment, a discussion that provides the reasons for concluding that the environmental impacts associated with site-specific decommissioning activities will be bounded by appropriate previously issued environmental impact statements, and a site-specific DCE, including the projected cost of managing irradiated fuel. The Palisades license transfer transaction closed on June 28, 2022. Accordingly, pursuant to 10 CFR 50.82(a)(4)(ii), the NRC is noticing receipt of the PSDAR and making it available for public comment.

III. Request for Comment and Public Meeting

The NRC is requesting public comments on the PSDAR, including the DCE, for Palisades. The NRC is planning to hold a public meeting in the vicinity of Palisades to discuss the PSDAR’s content and receive comments on Thursday, September 22, 2022, from 6:00 p.m. until 8:00 p.m. (CT), at the South Haven campus of Lake Michigan College, located at 125 Veterans Boulevard, in South Haven, Michigan. Please contact Marlayna Doell no later than September 9, 2022, if accommodations or special equipment is needed to attend or to provide comments. Additional information regarding the public meeting, including webinar information, will be posted on the NRC’s public meeting website at least 10 calendar days before the meeting. The NRC’s public meeting website is located at <https://www.nrc.gov/public-involve.html>. The NRC requests that comments that are not provided during the meeting be submitted as noted in Section I, “Obtaining Information and Submitting Comments,” of this document in writing by December 27, 2022.
