2. *OMB Number:* 3064-0211.

Affected Public: Innovators; technologists, coders, engineers and developers; consumers of financial services; consumer advocates; academics; members of trade groups and other associations; individuals connected to financial institutions, community banks, and financial and bank service and technology providers; software, data, and technology firms; and other members of the public.

Burden Estimate:

SUMMARY OF ESTIMATED ANNUAL BURDEN
[OMB No. 3064-0211]

Information collection description (obligation to respond)	Type of burden (frequency of response)	Number of respondents	Number of responses per respondent	Time per response (hours)	Annual Burden (hours)
Innovation Prize Competitions (Voluntary)	Reporting (Occasional)	1,500	1	20	30,000

General Description of Collection:

The FDIC seeks to extend, without change, its generic clearance for the collection of information requested from potential participants in FDIC-sponsored or co-sponsored prize competitions of various types, including point solution competitions (designed to spur the development of solutions for a particular problem) and exposition (designed competitions to identify and promote a broad range of ideas and practices to facilitate further development by third parties). Prize competitions and the opportunity to submit applications to participate will be announced on the agency's publicly accessible government website, as well as possibly through other forms of public communication, such as publication in the **Federal Register**, issuance of Financial Institution Letters, use of *challenge.gov* website maintained by the U.S. General Services Administration, or social media advertisement. In order for the FDIC to determine which applicants will be eligible and selected to participate in FDIC prize competitions, the FDIC will request that potential participants provide their name, contact information, address, and such other information that may be necessary to evaluate applicants' qualifications and ability to participate in the event as well as to match the applicants' anticipated role to the needs of the competition. Applicants will also be asked to acknowledge the terms and conditions of participating in the prize competition. Information will be collected during prize competitions through the solutions to the challenges or problems presented. This information collection will be voluntary. Collection

in the form of application will be conducted primarily online with alternative methods made available. Collection during the events will be in-person or electronic. The FDIC will consult with OMB regarding each specific information collection during the approval period. The FDIC estimates that over the three-year clearance period of this request, up to five (5) competitions will be conducted across various divisions of the agency, involving a variety of topics and challenges associated with underserved communities and financial inclusion; consumer protection; the FDIC's use of information technology and data (including artificial intelligence and machine learning); and financial and technologically-driven innovation in banking. The total hourly burden attributed to this generic clearance will be approximately 30,000 hours (an estimated average of 6,000 hours per prize competition × 5 competitions per year). There is no change in the method or substance of the collection. The estimated annual burden remains the same.

Request for Comment

Comments are invited on: (a) Whether the collections of information are necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collections, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collections of information

on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.
