review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: The statutory authority for this action is provided by section 112(r) of the Clean Air Act (CAA) as amended (42 U.S.C. 7412(r)). Each modification of the RMP rule that EPA proposes in this document is based on EPA's rulemaking authority under CAA section 112(r)(7) (42 U.S.C. 7412(r)(7)). CAA section 307(d) sets out requirements for the content of proposed and final rules, the docket for each rulemaking, opportunities for oral testimony on proposed rulemakings, the length of time for comments, and judicial review. The agencies implementing the Risk Management Program rule use RMPs to evaluate compliance with the Chemical Accident Prevention Provisions in 40 CFR part 68 and to identify sources for inspection that may pose significant risks to the community. Citizens may use the information to assess and address chemical hazards in their communities and to respond appropriately in the event of a release of a regulated substance.

The purpose of this action is to propose changes to the current RMP rule to improve safety at facilities that use and distribute hazardous chemicals. EPA believes that the RMP regulations have been effective in preventing and mitigating chemical accidents in the United States and that the proposed revisions, by giving special consideration to concerns about climate change and environmental justice and building on lessons learned from the current regulatory program, could further protect human health and the environment from chemical hazards through advancement of process safety. These revisions are informed by EPA's review of the current RMP rule and information EPA gathered from public listening sessions held in June and July 2021.

The proposed revisions seek to improve chemical process safety, assist in planning, preparedness, and responding to RMP accidents, and improve public awareness of chemical hazards at regulated sources. To accomplish this, these proposed provisions include several changes to the accident prevention program requirements, enhancements to the emergency preparedness requirements, increased public availability of chemical hazard information, and several other changes to certain regulatory definitions or points of clarification.

Form Numbers: None.

Respondents/affected entities: The industries that are likely to be affected by the requirements in the proposed regulations fall into numerous North American Industry Classification System (NAICS) categories. The types of facilities affected by the proposed rule range from petroleum refineries and large chemical manufacturers to water and wastewater treatment systems; chemical and petroleum wholesalers and terminals; food manufacturers, packing plants, and other cold storage facilities with ammonia refrigeration systems; agricultural chemical distributors; midstream gas plants; and a limited number of other sources that use RMP-regulated substances.

Respondent's obligation to respond: Mandatory (CAA sections 112(r)(7)(B)(i) and (ii), CAA section 112(r)(7)(B)(iii), 114(c), CAA 114(a)(1)).

Estimated number of respondents: 14,226.

Frequency of response: On occasion.

Total estimated burden: 797,642 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$79,248,522 (per year); includes \$2,817,907 annual operations and maintenance costs and \$78,400 annual capital costs (per year).

Changes in estimates: This a new ICR so there is no change in total estimated burden.

Director, Office of Emergency Management.
