SUPPLEMENTARY INFORMATION:

Background

Sugar Re-Export Programs

Pursuant to Additional U.S. Note 6 to chapter 17 of the Harmonized Tariff Schedule of the United States (HTSUS), FAS administers and manages three inter-related programs in the sugar market: the Refined Sugar Re-Export Program, the Sugar Containing Products Re-Export Program, and the Polyhydric Alcohol Program (collectively "Sugar Re-Export Programs") (7 CFR part 1530). FAS issues licenses to qualified sugar refiners, manufacturers of sugar-containing products (SCP), and producers of polyhydric alcohol not for human consumption that apply for these programs.

Under the Refined Sugar Re-Export Program, USDA issues licenses to sugar refiners to import low-duty raw sugar unrestricted by the raw sugar TRQ provided for in Additional U.S. Note 5(a)(i) in chapter 17 of the HTSUS and exempt from the requirement that imports be accompanied by a Certificate for Quota Eligibility (CQE) issued to the foreign exporter in accordance with 15 CFR part 2011. An equivalent quantity of domestically produced refined sugar must either be exported by the licensee or provided by the licensee to licensed U.S. manufacturers for use in exported SCP or licensed producers for use in polyhydric alcohol for non-food purposes.

Under the Sugar-Containing Products Re-Export Program, USDA issues licenses to U.S. manufacturers of SCP to purchase refined sugar from refiners with refined sugar re-export licenses for use in SCP to be exported to the world market.

Under the Polyhydric Alcohol Program, USDA issues licenses to U.S. producers of polyhydric alcohols to purchase refined sugar from refiners with refined sugar re-export licenses for use in the production of polyhydric alcohols, except polyhydric alcohols used as a substitute for sugar in human food consumption.

By statute, "for purposes of Additional U.S. Note 6 to chapter 17 of the Harmonized Tariff Schedule of the United States and the reexport programs and polyhydric alcohol program administered by the Secretary, all refined sugars (whether derived from sugar beets or sugarcane) produced by cane sugar refineries and beet sugar processors shall be fully substitutable
