

Return of Exported Products to the United States

When product inspected and passed by FSIS is exported, but then returned to this country, the owner, broker, or agent of the product (the applicant) arranges for the product's entry and notifies FSIS. In accordance with 9 CFR 327.17, 381.209, 557.17, and 590.965, exported product returned to this country is exempt from FSIS import inspection requirements upon notification to and approval from the Agency's Recall Management and Technical Analysis Division (RMTAD). RMTAD may require, however, that returned product be re-inspected at a federally-inspected facility for food safety and food defense determinations.

As part of this process, an applicant completes the FSIS Form 9010-1, *Application for the Return of Exported Products to the United States*. The purpose of the form is to allow RMTAD to decide whether re-inspection of the returned product is needed and to notify the appropriate FSIS office where to perform the re-inspection of the product, if necessary. If FSIS inspection program personnel determine that the product is safe and not adulterated or misbranded, the product may be released into domestic commerce.
