Supplementary Information:

In the Federal Register of May 10, 2022 (87 FR 27931), we amended the color additive regulations in part 73 (21 CFR part 73), “Listing of Color Additives Exempt From Certification,” to add a new § 73.32, “Antarctic krill meal.” The new regulation provides for the safe use of Antarctic krill meal, composed of the ground and dried tissue of Euphausia superba, with or without the lipid fraction, for use in the feed of salmonid fish, to enhance the color of their flesh.

We gave interested persons until June 10, 2022, to file objections or requests for a hearing. We received no objections or requests for a hearing on the final rule. Therefore, we find that the effective date of the final rule that published in the Federal Register of May 10, 2022, should be confirmed.
