

substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the product(s) and service(s) to the Government.

2. The action will result in authorizing small entities to furnish the product(s) and service(s) to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the product(s) and service(s) proposed for addition to the Procurement List.

End of Certification

Accordingly, the following service(s) are added to the Procurement List:

Service(s)

Service Type: Facility Support Services
Mandatory for: DHS, Transportation Security Administration Headquarters, Springfield, VA (for TSA Headquarters Customer Service Team Requirements)
Mandatory Source of Supply: Didlake, Inc., Manassas, VA

Contracting Activity: TRANSPORTATION SECURITY ADMINISTRATION, WEO

The Committee finds good cause to dispense with the 30-day delay in the effective date normally required by the Administrative Procedure Act. See 5 U.S.C. 553(d). This addition to the Committee's Procurement List is effectuated because of the expiration of the Facility Support Services, DHS, TSA HQ, Springfield, VA (for TSA Headquarters Customer Service Team Requirements) contract. The Federal customer contacted and has worked diligently with the AbilityOne Program to fulfill this service need under the AbilityOne Program. To avoid performance disruption, and the possibility that the Transportation Security Administration will refer its business elsewhere, this addition must be effective on September 30, 2022, ensuring timely execution for an October 1, 2022 start date while still allowing 22 days for comment. Pursuant to its own regulation 41 CFR 51–2.4, the Committee has been in contact with one of the affected parties, the incumbent of the expiring contract, since March 2022 and determined that no severe adverse impact exists. The Committee also published a notice of proposed Procurement List addition in the **Federal Register** on June 17, 2022 and did not receive any comments from any interested persons, including from the

incumbent contractor. This addition will not create a public hardship and has limited effect on the public at large, but, rather, will create new jobs for other affected parties—people with significant disabilities in the AbilityOne program who otherwise face challenges locating employment. Moreover, this addition will enable Federal customer operations to continue without interruption.

Acting Director, Business Operations.

SUPPLEMENTARY INFORMATION: Section 104(b) of the Consumer Product Safety Improvement Act of 2008 (CPSIA) requires the Commission to adopt mandatory standards for durable infant or toddler products. 15 U.S.C. 2056a(b)(1). Mandatory standards must be "substantially the same as" voluntary standards, or may be "more stringent" than voluntary standards, if the Commission determines that more stringent requirements would further reduce the risk of injury associated with the products. *Id.* Mandatory standards may be based, in whole or in part, on a voluntary standard.

Pursuant to section 104(b)(4)(B) of the CPSIA, if a voluntary standards organization revises a standard that has been adopted, in whole or in part, as a consumer product safety standard under CPSIA section 104, it must notify the Commission. The revised voluntary standard then shall be considered to be a consumer product safety standard issued by the Commission under section 9 of the Consumer Product Safety Act (15 U.S.C. 2058), effective 180 days after the date on which the organization notifies the Commission (or a later date specified by the Commission in the **Federal Register**) unless, within 90 days after receiving that notice, the Commission responds to the organization that it has determined that the proposed revision does not improve the safety of the consumer product covered by the standard, and therefore the Commission is retaining its existing

mandatory consumer product safety standard. 15 U.S.C. 2056a(b)(4)(B).

Under this authority, the Commission issued a mandatory safety rule for infant walkers in 2010. The rulemaking created 16 CFR part 1216, which incorporated by reference ASTM F977-07, Standard Consumer Safety Specification for Infant Walkers, with modifications. 75 FR 35266 (Jun. 21, 2010). The mandatory standard included performance requirements and test methods, as well as requirements for warning labels and instructions, to address hazards to children associated with infant walkers. Since promulgation of the final rule, ASTM revised the voluntary standard in May 2012. On June 24, 2013, the Commission revised the mandatory standard to incorporate by reference ASTM F977-12, the current mandatory standard, without modification. 78 FR 37706 (Jun. 24, 2013). In 2018, ASTM revised ASTM F977 but did not notify the Commission of that ASTM F977-18 revision.

In July 2022, ASTM published a revised version of the incorporated voluntary standard, ASTM F977-22. ASTM subsequently published ASTM F977-22e1 to make editorial corrections to the standard. On August 29, 2022, ASTM notified the Commission that it had approved the revised version of the voluntary standard. This revised version, ASTM F977-22e1, builds on the revisions made to the standard in 2018 and 2022.

CPSC staff is assessing the revised voluntary standard to determine, consistent with section 104(b)(4)(B) of the CPSIA, its effect on the safety of the consumer product covered by the standard. The Commission invites public comment on that question to inform staff's assessment and any subsequent Commission consideration of the revisions in ASTM F977-18, ASTM F977-22, and ASTM F977-22e1.¹

The incorporated voluntary standard and the revisions to the voluntary standard are available for review in several ways. ASTM has provided on its website (at www.astm.org/CPSC.htm), at no cost for read-only access, red-lined versions of ASTM F977-18, ASTM F977-22, and ASTM F977-22e1 that show the changes made by these revisions. Likewise, a read-only copy of the existing, incorporated standard (ASTM F977-12) is available for viewing, at no cost, on the ASTM website at: www.astm.org/READINGLIBRARY/. Interested parties can also download copies of the
