

Form Numbers: None.

Respondents/affected entities:

Pressure sensitive tape and label surface coating operations.

Respondent's obligation to respond:

Mandatory (40 CFR part 60, subpart RR).

Estimated number of respondents: 48 (total).

Frequency of response: Semiannual.

Total estimated burden: 4,530 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$636,000 (per year), which includes \$93,400 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an increase in burden from the most-recently approved ICR. This increase is not due to any program changes. The change in burden and cost estimates is due to an increase in the number of sources, based on an assumption of continued industry growth.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NSPS for Ammonium Sulfate Manufacturing Plants (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), NSPS for Ammonium Sulfate Manufacturing Plants (EPA ICR Number 1066.10, OMB Control Number 2060-0032), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through November 30, 2022. Public comments were previously requested, via the **Federal Register** on April 8, 2022 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before October 11, 2022.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OAR-2022-0059, online using <https://www.regulations.gov/> (our preferred method), or by email to docket@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

The EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Abstract: The New Source Performance Standards (NSPS) for Ammonium Sulfate Manufacturing Plants (40 CFR part 60, subpart PP) were proposed on February 4, 1980, promulgated on November 12, 1980, and amended on October 17, 2000. These regulations apply to ammonium sulfate dryers located at both existing and new ammonium sulfate manufacturing plants in the caprolactam by-product, synthetic, and coke oven by-products sectors of the ammonium sulfate manufacturing industry. New facilities include those that commenced construction, modification or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 60, subpart PP. In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or

malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Form Numbers: None.

Respondents/affected entities: Ammonium sulfate manufacturing facilities in the caprolactam by-product, synthetic, and coke oven by-products sectors of the ammonium sulfate manufacturing industry.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart PP).

Estimated number of respondents: 2 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 286 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$34,300 (per year), which includes \$0 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: (1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs.

Director, Regulatory Support Division.

SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: This information collection request will allow EPA to employ a contractor to compile data from private companies providing compliance testing to owners of federally regulated underground storage tank systems (USTs). The completed dataset of test results will allow EPA to evaluate the effectiveness of several of the newly required measures to prevent fuel releases included in the 2015 federal UST regulation: spill containment liquid tightness testing, containment sump liquid tightness testing (for containment sumps used for interstitial monitoring of piping of single-wall construction), overfill equipment inspections, and two types of annual leak detection equipment testing. EPA is interested in quantitatively assessing if passing rates improve between initial and subsequent rounds of testing in the 15 states from which data will be collected. EPA will use the data to identify if, and by how much, testing required by the regulation impacts equipment performance over time. EPA will use this information to enhance national UST program performance. EPA will share the information gathered from this collection with all state implementing agencies, who could use the results to better inform their future regulations, policies, and guidance for preventing UST releases. Sharing this information will help states implement their programs better, which will help EPA execute national UST program goals and better protect human health and the environment.

Form Numbers: None.

Respondents/affected entities: UST testing and compliance companies, UST facility owners and operators.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 60.

Frequency of response: One-time collection.

Total estimated burden: 1,275 hours per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$53,398.75 (per year), includes \$0 annualized capital or operation & maintenance costs.
