<sup>4</sup> FAC-010-2, FAC-011-2 and FAC-014-2 were all approved by the Commission in Docket No. IC14-5-000 COMMISSION INFORMATION COLLECTION ACTIVITIES (FERC-725D); COMMENT REQUEST; EXTENSION (February 21, 2014) with a burden of 138,979 hours. Staff estimates that the PC burden under FAC-010-3 from that estimate is 10 percent of the total or 13,898 hours. FERC staff estimates that industry costs for salary plus benefits are similar to Commission costs. The FERC 2021 average salary plus benefits for one FERC full-time equivalent (FTE) is \$180,703/year (or \$87.00/hour) posted by the Bureau of Labor Statistics for the Utilities sector (available at [https://www.bls.gov/oes/current/naics3\\_221000.htm](https://www.bls.gov/oes/current/naics3_221000.htm)).

<sup>5</sup> In Docket No. RM13-8-000 FERC 725D OMB Control: From 1902-0247 for the FAC-010-2.1 Requirement R5 burden of 1,600hrs should be retired with full retirement of FAC-010-3.

<sup>6</sup> The total of manhours associated FAC-010-3 equals the sum of 13,898 hrs. + 1,600 hrs. = 15,498 hrs.

<sup>7</sup> Proposed revision is a one-time change to align updated terminology in the NERC Standards.

<sup>8</sup> Proposed revision adds burden to the RC only.

<sup>9</sup> The removal of the PC from PRC-002-3 is a one-time reduction in burden. Eastern and ERCOT interconnection impacted.

<sup>10</sup> Proposed revision adds burden to the PA/PC only and is a one-time change to align updated terminology in the NERC Standards.

<sup>11</sup> Proposed revision adds burden to the PA/PC only and is a one-time change to align updated terminology in the NERC Standards.

<sup>12</sup> Proposed revision adds burden to the TOP only.

### Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NSPS for Fossil Fuel Fired Steam Generating Units (Renewal)

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NSPS for Fossil Fuel Fired Steam Generating Units (EPA ICR Number 1052.13, OMB Control Number 2060-0026), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through November 30, 2022. Public comments were previously requested via the **Federal Register** on April 8, 2022 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

**SUPPLEMENTARY INFORMATION:**

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at <https://www.regulations.gov>, or in person at the EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. *Abstract:* The New Source Performance Standards (NSPS) for Fossil Fuel Fired Steam Generating Units (40 CFR part 60, subpart D) apply to each fossil fuel fired steam generating unit with heat input rate of 73 megawatts (MW) (250 MMbtu/hr) or more, which commenced construction, reconstruction, or modification after August 17, 1971. Subpart D regulations apply to both electric utility and industrial boilers. This regulation was supplanted by NSPS Subpart Da for electric utility steam generating units in 1978, and by NSPS Subpart Db for industrial-institutional-commercial boilers in 1986. In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

*Form Numbers:* None.

*Respondents/affected entities:*

Owners and operators of fossil fuel fired steam generating units.

*Respondent's obligation to respond:* Mandatory (40 CFR part 60, subpart D).

*Estimated number of respondents:* 660 (total).

*Frequency of response:* Semiannually.

*Total estimated burden:* 71,500 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$18,500,000 (per year), which includes \$9,900,000 in annualized capital/startup and/or operation & maintenance costs.

*Changes in the Estimates:* There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two

considerations: (1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs.

*Abstract:* The New Source Performance Standards (NSPS) for Pressure Sensitive Tape and Label Surface Coating Operations (40 CFR part 60 subpart RR) were proposed on December 30, 1980, and promulgated on October 18, 1983, and amended on October 17, 2000. These regulations apply to existing facilities and new facilities with coating lines used in the manufacture of pressure sensitive tape and label materials. Existing facilities and new facilities are both subject to these regulations, except those facilities that input 45 mega grams (Mgs) of volatile organic compounds (VOC) or less per 12-month period. New facilities include those that commenced construction, modification or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 60, subpart RR.
