Abstract: The Land and Water Conservation Fund Act of 1965, as amended (LWCF Act) (54 U.S.C. 200301 *et seq.*) was enacted to help preserve, develop, and ensure access for the public to outdoor recreation opportunities. Among other programs, the LWCF Act provides funds for and authorizes federal assistance to the States for planning, acquisition, and development of needed land and water areas and facilities for outdoor recreation purposes. In accordance with the LWCF Act, the National Park Service (we, NPS) administers the LWCF State Assistance Program, which provides matching grants to States.

LWCF grants are provided to states (including the 50 states; the Commonwealths of Puerto Rico and the Northern Mariana Islands; the District of Columbia; and the Territories of Guam, the U.S. Virgin Islands, and American Samoa) on a matching basis for up to 50 percent of the total project-related allowable costs. Grants to eligible insular areas may be for 100 percent assistance. Payments for all projects are made to the state organization that is authorized to accept and administer funds paid for approved projects. Local units of government participate in the program as sub-grantees of the state with the state retaining primary grant compliance responsibility.

Abstract: The Organic Act of 1916 (NPS Organic Act) (54 U.S.C. 100101) authorizes the Secretary of the Interior to develop regulations for units of the national park system (System units) under the Department's jurisdiction. The Mining in the Parks Act (54 U.S.C. 100731 *et seq.*) directs the Secretary of the Interior to regulate all operations in System units in connection with the exercise of mineral rights on patented and unpatented mining claims.

The regulations codified in 36 CFR part 9, subparts A and B, ensure that mining and non-Federal oil and gas activities in System units are conducted in a manner consistent with conserving each System unit for the benefit of present and future generations. The information required by Subpart A identifies the claim, claimant, and operator (the claimant and operator are often the same) and details how the operator intends to access and develop the minerals associated with the claim. It also identifies the steps the operator intends to take to minimize any adverse impacts of the mining operations on park resources and values. No information, except claim ownership information, is submitted unless the claimant wishes to conduct mining operations. The information required by Subpart B identifies the owner and operator (the owner and operator are often the same) and details how the operator intends to access and develop the oil and gas rights. It also identifies the steps the operator intends to take to minimize any adverse impacts on park resources and values. No information is submitted unless the owner wishes to conduct oil and gas operations. The information collected is used to evaluate proposed operations, ensure that all necessary mitigation measures are employed to protect park resources and values, and ensure compliance with all applicable laws and regulations.
