

The FAA estimates that it would take 64 work-hours (at \$85 per work-hour) to replace an engine, if required based on the results of any required actions. The FAA has received no definitive data on which to base the estimate for the cost of a replacement engine or any necessary additional on-condition actions that would be required by this proposed AD. The FAA has no way of determining the number of aircraft that might need these on-condition actions.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Would not affect intrastate aviation in Alaska, and
- (3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator,

the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Airbus SAS: Docket No. FAA–2022–1155; Project Identifier MCAI–2022–00655–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by October 27, 2022.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all Airbus SAS Model A321–251N, A321–251NX, A321–252N, A321–252NX, A321–253N, and A321–253NX airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 71, Powerplant.

(e) Unsafe Condition

This AD was prompted by a stress analysis on the engine structure that indicated that the fail-safe lug may not be able to sustain, during one inspection interval, as currently specified in airworthiness limitation item (ALI) task 712232–01–1, the loads deriving from the engagement of the secondary load path within that inspection interval for the aft engine mount system. The FAA is issuing this AD to address potential failure of the LEAP–1A aft engine mount waiting fail-safe male lug, which could lead to engine mount rupture, possibly resulting in engine loss during flight and loss of control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2022–0089, dated May 17, 2022 (EASA AD 2022–0089).

(h) Exceptions to EASA AD 2022–0089

(1) Where paragraph (3) of EASA AD 2022–0089 specifies corrective action if "discrepancies are detected, as defined in the SB," for purposes of this AD, discrepancies include a fail safe pin that does not rotate freely, or has damage (dents, scratches, nicks, corrosion, or cracks).

(2) The "Remarks" section of EASA AD 2022–0089 does not apply to this AD.

(i) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the Large Aircraft Section, International Validation Branch, send it to the attention of the person identified in paragraph (j)(2) of this AD. Information may be emailed to: 9-AVS-AIR-730-AMOC@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, Large Aircraft Section, International Validation Branch, FAA; or EASA; or Airbus SAS's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(j) Related Information

(1) For EASA AD 2022–0089, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email ADs@easa.europa.eu; internet easa.europa.eu. You may find this EASA AD on the EASA website atad.easa.europa.eu. You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. This material may be found in the AD docket at regulations.gov by searching for and locating Docket No. FAA–2022–1155.

(2) For more information about this AD, contact Dan Rodina, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th Street, Des Moines, WA 98198; telephone and fax 206–231–3225; email dan.rodina@faa.gov.

Issued on September 2, 2022.

Christina Underwood,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R07–OAR–2022–0746; FRL–10184–01–R7]

Air Plan Approval; MO; Restriction of Visible Air Contaminant Emissions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing approval of revisions to the Missouri State Implementation Plan (SIP) received on November 29, 2016, and March 7, 2019. The revision was submitted by Missouri in response to a finding of substantial inadequacy and SIP call published on June 12, 2015, for a provision in the Missouri SIP related to excess emissions during startup, shutdown, and malfunction (SSM) events. In the submissions, Missouri requests to revise a regulation related to restriction of emissions of visible air contaminants. The revisions to the rule include: removing a statement from the compliance and performance testing provisions that does not meet Clean Air Act requirements, adding exemptions for emission units regulated by stricter federal and state regulations or that do not have the capability of exceeding the emission limits of the rule, adding an alternative test method and making other administrative changes. Approval of these revisions will ensure consistency between state and federally approved rules.

DATES: Comments must be received on or before October 12, 2022.

ADDRESSES: You may send comments, identified by Docket ID No. EPA–R07–OAR–2022–0746 to www.regulations.gov. Follow the online instructions for submitting comments.

Instructions: All submissions received must include the Docket ID No. for this rulemaking. Comments received will be posted without change to www.regulations.gov including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the “Written Comments” heading of the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Ashley Keas, Environmental Protection Agency, Region 7 Office, Air Quality Planning Branch, 11201 Renner Boulevard, Lenexa, Kansas 66219; telephone number: (913) 551–7629; email address: keas.ashley@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document “we,” “us,” and “our” refer to the EPA.

I. Written Comments

Submit your comments, identified by Docket ID No. EPA–R07–OAR–2022–0746, at www.regulations.gov. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit www.epa.gov/dockets/commenting-epa-dockets.

II. Background

On February 22, 2013, the EPA issued a **Federal Register** notice of proposed rulemaking outlining EPA’s policy at the time with respect to SIP provisions related to periods of startup, shutdown and malfunction (SSM). EPA analyzed specific SSM SIP provisions and explained how each one either did or did not comply with the Clean Air Act (CAA) with regard to excess emission events.¹ For each SIP provision that EPA determined to be inconsistent with the CAA, EPA proposed to find that the existing SIP provision was substantially inadequate to meet CAA requirements and thus proposed to issue a SIP call under CAA section 110(k)(5).

On June 12, 2015, pursuant to CAA section 110(k)(5), EPA finalized “State Implementation Plans: Response to Petition for Rulemaking; Restatement and Update of EPA’s SSM Policy Applicable to SIPs; Findings of Substantial Inadequacy; and SIP Calls To Amend Provisions Applying to Excess Emissions During Periods of Startup, Shutdown and Malfunction,” (80 FR 33839, June 12, 2015), hereafter

referred to as the “2015 SSM SIP Action.” The 2015 SSM SIP Action clarified, restated, and updated EPA’s interpretation that SSM exemption and affirmative defense SIP provisions are inconsistent with CAA requirements. The 2015 SSM SIP Action found that certain SIP provisions in 36 states were substantially inadequate to meet CAA requirements and issued a SIP call to those states to submit SIP revisions to address the inadequacies. The 2015 SSM SIP Action identified specific provisions of this Missouri rule, 10 Code of State Regulation (CSR) 10–6.220, *Restriction of Emissions of Visible Air Contaminants* as being substantially inadequate to meet CAA requirements. EPA established an 18-month deadline by which the affected states had to submit such SIP revisions. States were required to submit corrective revisions to their SIPs in response to the SIP calls by November 22, 2016.

EPA issued a Memorandum in October 2020 (2020 Memorandum), which stated that certain provisions governing SSM periods in SIPs could be viewed as consistent with CAA requirements.² Importantly, the 2020 Memorandum stated that it “did not alter in any way the determinations made in the 2015 SSM SIP Action that identified specific state SIP provisions that were substantially inadequate to meet the requirements of the Act.” Accordingly, the 2020 Memorandum had no direct impact on the SIP call issued to Missouri in 2015. The 2020 Memorandum did, however, indicate EPA’s intent at the time to review SIP calls that were issued in the 2015 SSM SIP Action to determine whether EPA should maintain, modify, or withdraw particular SIP calls through future agency actions.

On September 30, 2021, EPA’s Deputy Administrator withdrew the 2020 Memorandum and announced EPA’s return to the policy articulated in the 2015 SSM SIP Action (2021 Memorandum).³ As articulated in the 2021 Memorandum, SIP provisions that contain exemptions or affirmative defense provisions are not consistent with CAA requirements and, therefore, generally are not approvable if contained in a SIP submission. This

² October 9, 2020, memorandum “Inclusion of Provisions Governing Periods of Startup, Shutdown, and Malfunctions in State Implementation Plans,” from Andrew R. Wheeler, Administrator.

³ September 30, 2021, memorandum “Withdrawal of the October 9, 2020, Memorandum Addressing Startup, Shutdown, and Malfunctions in State Implementation Plans and Implementation of the Prior Policy,” from Janet McCabe, Deputy Administrator.

¹ State Implementation Plans: Response to Petition for Rulemaking; Findings of Substantial Inadequacy; and SIP Calls To Amend Provisions Applying to Excess Emissions During Periods of Startup, Shutdown, and Malfunction, 78 FR 12460 (Feb. 22, 2013).

policy approach is intended to ensure that all communities and populations, including overburdened communities, receive the full health and environmental protections provided by the CAA.⁴ The 2021 Memorandum also retracted the prior statement from the 2020 Memorandum of EPA's plans to review and potentially modify or withdraw particular SIP calls. That statement no longer reflects EPA's intent. EPA intends to implement the principles laid out in the 2015 SSM SIP Action as the agency takes action on SIP submissions, including this SIP submittal provided in response to the 2015 SIP call.

With regard to the Missouri SIP, in the 2015 SSM SIP Action, EPA determined that a provision of 10 Code of State Regulations (CSR) 10–6.220 *Restriction of Emissions of Visible Air Contaminants* was substantially inadequate to meet CAA requirements (80 FR 33840, 33969). Specifically, 10–6.220(3)(c) provided: “Visible emissions over the limitations shown in subsection (3)(B) of this rule are in violation of this rule unless the director determines that the excess emissions do not warrant enforcement action based on data submitted under 10 CSR 10–6.050 Start-Up, Shutdown and Malfunction Conditions.” The rationale underlying EPA's determination that the provision was substantially inadequate to meet CAA requirements, and therefore to issue a SIP call to Missouri to remedy the provision, is fully detailed in the 2015 SSM SIP Action and the accompanying proposals. Specifically, EPA agreed with petitioners on the basis that this provision could be read to allow for exemptions from the otherwise applicable SIP emission limitations through a state official's unilateral exercise of discretionary authority that is insufficiently bounded and includes no additional public process at the state or federal level. In summary, EPA agreed with petitioners that this provision would allow the state director to circumvent EPA authority and/or citizen suit authority to enforce the emissions limitations, which is inconsistent with the CAA and EPA's policy outlined in the 2015 SSM SIP Action.

Missouri submitted a SIP revision on November 29, 2016, in response to the SIP call issued in the 2015 SSM SIP Action. In its submission, Missouri requests that EPA revise the Missouri SIP by removing the provision 10–6.220(3)(c) from the SIP, thereby correcting the deficiency identified in

the 2015 SSM SIP Action and addressing the SIP Call for Missouri.

III. What is being addressed in this document?

The EPA is proposing to approve Missouri's revisions to 10 CSR 10–6.220, *Restriction of Emissions of Visible Air Contaminants*, in the Missouri SIP. The EPA received two SIP revision submissions related to this state rule from the Missouri Department of Natural Resources (MoDNR) on November 29, 2016, and March 7, 2019. The full text of these changes as well as EPA's analysis of the changes can be found in the technical support document (TSD), which is included in the docket for this action.

In its November 29, 2016, submission, MoDNR requested to remove the provision that was identified by EPA as being substantially inadequate to meet CAA requirements in EPA's 2015 SSM SIP Action. EPA is proposing to determine that removal of this provision is consistent with EPA's policy outlined in the 2015 SSM SIP Action and sufficiently addresses the deficiencies identified by the 2015 SSM SIP Call.

In addition to the removal of the identified SSM deficiency, MoDNR, in both the 2016 and 2019 submissions, also requested revisions related to opacity monitoring requirements and exemptions from the opacity limits and recordkeeping and reporting requirements of 10 CSR 10–6.220 for certain source types. Specifically, MoDNR exempted specific, limited, emission units regulated by stricter federal and state regulations. MoDNR also provided an exemption for certain emission units that do not have the capability of exceeding the emission limits of the rule. One example of an added exemption is for units regulated under 40 CFR 63 subpart UUUUU—*Mercury and Air Toxics Standards*, that demonstrate compliance with a particulate matter continuous emission monitoring system (CEMS) as the limits in this federal rule are more stringent than the opacity limits contained in the state rule. The newly added exemptions for sources that already comply with more stringent state or federal requirements will remove the duplicative monitoring and reporting requirements associated with the less stringent requirements of the state opacity rule.

Missouri provided a demonstration pursuant to CAA section 110(l) to ensure the rule revisions, including the added exemptions, do not interfere with any applicable requirement concerning attainment and reasonable further progress, or any other applicable

requirement of the Act. EPA reviewed MoDNR's section 110(l) demonstration which explains the sources that will be newly exempt from the opacity limits of this state rule remain subject to more stringent federal or state regulations that apply on a continuous basis. For this reason, the emissions change associated with the rule revisions is expected to be relatively small if any. Additionally, the opacity limits contained in this rule, and more specifically for the units being exempted from the limits of this state rule, are not relied upon for attainment or maintenance purposes.

Opacity is often used as an indicator of the degree of particulate matter emissions. All PM_{2.5} monitors in the state are measuring compliance with the annual and 24-hour PM_{2.5} standards and all counties in Missouri are designated as unclassifiable/attainment for both the 2012 annual and 2006 24-hour PM_{2.5} NAAQS. Further, the sources are not exempt from all opacity requirements and, in fact, are subject to the more stringent requirements found in the applicable federal rules. The expected change in emissions associated with these rule revisions is relatively small if any and therefore would not interfere with attainment or maintenance of the NAAQS.

Further, EPA is proposing to approve removal of the prior deficient exemption for excess emissions during periods of SSM from this rule. EPA believes that any emission limit or requirement relied upon as being more stringent to exempt a source from this rule must apply continuously, that is without any exemptions for periods of SSM, to be more stringent than the limits contained in this rule.

MoDNR also provided information to support the exemption for emission units burning certain fuels that are not capable of exceeding the opacity limits contained in the rule by estimating maximum emissions based on EPA emissions factors for each fuel type. EPA reviewed MoDNR's demonstration and proposes to agree that this added exemption would result in a relatively small emissions change if any and therefore would not interfere with attainment or maintenance of the NAAQS.

Based on EPA's review of Missouri's section 110(l) demonstration and our analysis of these changes as fully described in the TSD in the docket for this proposed rule, the expected change in emissions associated with these rule revisions is relatively small if any and therefore EPA proposes to find the revisions will not interfere with attainment or maintenance of the

⁴ 80 FR 33985.

NAAQS or other CAA requirements consistent with CAA Section 110(l).

MoDNR also added an alternative test method and made other administrative wording changes such as adding rule specific definitions. EPA proposes to find these edits do not adversely impact the stringency of the SIP and are consistent with CAA requirements. Therefore, EPA proposes to approve these revisions as further detailed in the TSD.

IV. Have the requirements for approval of a SIP revision been met?

The State submission has met the public notice requirements for SIP submissions in accordance with 40 CFR 51.102. The submission also satisfied the completeness criteria of 40 CFR part 51, appendix V. The State provided public notice on the November 29, 2016, SIP revision from June 1, 2016, to August 4, 2016, and held a public hearing on July 28, 2016. During the public comment period, the State received seven comments from five sources, consisting primarily of supportive or clarifying comments from industry groups. The State addresses the comments in its submittal included in the docket for this proposal. The State provided public notice on the March 7, 2019, SIP revision from August 1, 2018, to October 4, 2018, and held a public hearing on September 27, 2018. During the public comment period, the State received nine comments, seven of which were from EPA. The State addresses the comments in its submittal. Further discussion of the state responses to comments received is included in the TSD and the state submittal documents in the docket. In addition, as explained above and in the TSD, the revision meets the substantive SIP requirements of the CAA, including section 110 and implementing regulations.

V. What action is the EPA proposing to take?

The EPA proposes to approve the revisions to 10 CSR 10–6.220 as requested by Missouri in submissions dated November 29, 2016 and March 7, 2019. We are soliciting comments on this proposed action. We are soliciting comments solely on the proposed revisions to the rule and not on the existing text that is approved into Missouri's SIP. Final rulemaking will occur after consideration of any comments.

VI. Environmental Justice Considerations

Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and

Low-Income Populations, 59 FR 7629, Feb. 16, 1994) directs Federal agencies to identify and address “disproportionately high and adverse human health or environmental effects” of their actions on minority populations and low-income populations to the greatest extent practicable and permitted by law. The EPA defines environmental justice (EJ) as “the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.” The EPA further defines the term fair treatment to mean that “no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental, and commercial operations or programs and policies.”

The state did not evaluate environmental justice considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. While EPA did not perform an area-specific EJ analysis for purposes of this action, due to the nature of the action being taken here, *i.e.* to remove an exemption for excess emissions during periods of SSM and add exemptions for sources subject to equivalent or more stringent limits, as explained in this preamble and the technical support document in this docket, this action is expected to have a neutral to positive impact on air quality. Because consideration of EJ is not required as part of this action, there is no information in the record inconsistent with the stated goals of E.O. 12898 of achieving environmental justice for people of color, low-income populations, and indigenous peoples.

This action approves revisions to a Missouri state rule concerning visible emissions. As explained in the preamble and technical support document, the emissions change associated with the revisions requested by Missouri is expected to be small if any. Therefore, we expect that this action will not interfere with attainment or maintenance of the NAAQS, reasonable further progress, or other CAA requirements. For these reasons, this action is not expected to have a disproportionately high or adverse human health or environmental effects on a particular group of people.

VII. Incorporation by Reference

In this document, the EPA is proposing to include regulatory text in

an EPA final rule that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference the Missouri Regulations discussed in Section III of this preamble and as set forth below in the proposed amendments to 40 CFR part 52. The EPA has made, and will continue to make, these materials generally available through www.regulations.gov and at the EPA Region 7 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

VIII. Statutory and Executive Order Reviews

Under the Clean Air Act (CAA), the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of the National Technology Transfer and Advancement Act (NTTA) because this

rulemaking does not involve technical standards; and

- This action does not have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations and/or indigenous peoples, as specified in Executive Order 12898 (59 FR 7629, February 16, 1994). The basis for this determination is contained in Section VI of this action, “Environmental Justice Concerns.”

The SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal

governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: September 6, 2022.

Meghan A. McCollister,
Regional Administrator, Region 7.

For the reasons stated in the preamble, the EPA proposes to amend 40 CFR part 52 as set forth below:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart AA—Missouri

■ 2. In § 52.1320, the table in paragraph (c) is amended by revising the entry for “10–6.220” to read as follows:

§ 52.1320 Identification of plan.

Pipeline and Hazardous Materials Safety Administration

49 CFR Parts 171, 172, 173, 174, 175, 176, and 177

[Docket No. PHMSA–2018–0081 (HM–250A)]

RIN 2137–AF42

Hazardous Materials: Compatibility With the Regulations of the International Atomic Energy Agency

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: PHMSA, in coordination with the Nuclear Regulatory Commission, proposes to amend the Hazardous Materials Regulations to maintain alignment with international regulations and standards governing the transportation of Class 7 radioactive materials. Specifically, PHMSA proposes to adopt changes contained in the International Atomic Energy Agency standards. Additionally, PHMSA proposes regulatory amendments identified through internal regulatory review processes to update, clarify, correct, or streamline certain regulatory requirements applicable to the transportation of Class 7 (radioactive) materials.

DATES: Comments must be received by December 12, 2022. To the extent possible, PHMSA will consider late-

filed comments as a final rule is developed.

ADDRESSES: You may submit comments by any of the following methods:

- *Federal Rulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments.
- *Fax:* 1–202–493–2251.
- *Mail:* Docket Management System.
- U.S. Department of Transportation, Docket Operations, M–30, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590–0001.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590–0001 between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Instructions: Include the agency name and docket number PHMSA–2018–0081 (HM–250A) or RIN 2137–AF42 for this rulemaking at the beginning of your
