III. Description of Programs and Potential Disclosure of Information Claimed as Confidential Business Information (CBI) to Contractors

EPA's Office of Transportation and Air Quality (OTAQ) has responsibility for protecting public health and the environment by regulating air pollution from motor vehicles, engines, and the fuels used to operate them, and by encouraging travel choices that minimize emissions. To implement various Clean Air Act (CAA) programs, and to permit regulated entities flexibility in meeting regulatory requirements (*e.g.*, compliance on average), we collect compliance reports and other information from them. Parties may claim the submitted information as CBI. Information submitted under such a claim is handled in accordance with EPA's regulations at 40 CFR part 2, subpart B and in accordance with EPA procedures, including comprehensive system security planning. When EPA has determined that disclosure of information claimed as CBI to contractors is necessary, the corresponding contract must address the appropriate use and handling of the information by the contractor and the contractor must require its personnel who require access to information claimed as CBI to sign written non-disclosure agreements before they are granted access to data.

In accordance with 40 CFR 2.301(h), we have determined that the contractors, subcontractors, and grantees (collectively referred to as "contractors") listed below require access to CBI submitted to us under the CAA and in connection with various programs related to the regulation of fuels under 40 CFR parts 79, 80 and 1090. OTAQ collects this data to monitor compliance with CAA programs and, in many cases, to permit regulated parties flexibility in meeting regulatory requirements. Certain programs under 40 CFR parts 79, 80 and 1090 are designed to permit regulated parties an opportunity to comply on average, or to engage in transactions using various types of credits. For example, parties that participate in programs that utilize credits (*e.g.*, the gasoline sulfur and gasoline benzene

program, or renewable identification numbers, RINs, in RFS) submit information related to credit or RIN transactions. Data submitted under 40 CFR parts 79, 80 and 1090 includes information related to fuel and fuel additives (e.g., chemical formulas), renewable fuels, gasoline, diesel fuel, gasoline detergent additives, and regulated blendstocks. Fuels program data is reviewed and assessed to determine the environmental performance of the programs or to plan for regulatory improvements. We are issuing this notice to inform all affected submitters of information that we plan to grant access to material that may be claimed as CBI to the contractors identified below on a need-to-know basis.
