

Project Reporting module in *Research.gov* and an external technical assistance contractor that collects programmatic data electronically. These indicators are both quantitative and descriptive and may include, for example, the characteristics of center personnel and students; sources of financial support and in-kind support; expenditures by operational component; characteristics of industrial and/or other sector participation; research activities; education activities; knowledge transfer activities; patents, licenses; publications; degrees granted to students involved in Center activities; descriptions of significant advances and other outcomes of the MRSEC effort. Such reporting requirements are included in the cooperative agreement that is binding between the academic institution and NSF.

Each Center's annual report will address the following categories of activities: (1) research, (2) education, (3) knowledge transfer, (4) partnerships, (5) shared experimental facilities, (6) diversity, (7) management, and (8) budget issues.

For each of the categories the report will describe overall objectives for the year, problems the Center has encountered in making progress towards goals, anticipated problems in the following year, and specific outputs and outcomes.

MRSECs are required to file a final report through the RPPR and external technical assistance contractor. Final reports contain similar information and metrics as annual reports, effectively they constitute the last annual report; the Program Officer maintains a cumulative database with all relevant achievements and metrics.

Use of the Information: NSF uses the information to continue funding of the Centers, and to evaluate the progress of the program.

Estimate of Burden: 80 hours per center for 20 centers for a total of 1,600 hours.

Respondents: Non-profit institutions.

Estimated Number of Responses per Report: One from each of the 20 MRSECs.

Dated: September 12, 2022.

NUCLEAR REGULATORY COMMISSION

[Docket No. 70-1151; NRC-2015-0039]

Westinghouse Electric Company, LLC; Columbia Fuel Fabrication Facility

AGENCY: Nuclear Regulatory Commission.

ACTION: License renewal; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has renewed Special Nuclear Materials (SNM) License No. SNM-1107 for the continued operation of the Westinghouse Electric Company, LLC (WEC) Columbia Fuel Fabrication Facility (CFFF) located in Hopkins, South Carolina. License No. SNM-1107 authorizes WEC to continue to operate the CFFF for a period of 40 years, and will expire on September 12, 2062. The CFFF manufactures nuclear fuel assemblies for commercial nuclear power reactors.

DATES: License No. SNM-1107 was issued on September 12, 2022, and is effective as of the date of issuance.

ADDRESSES: Please refer to Docket ID NRC-2015-0039 when contacting the

NRC about the availability of information regarding this action. You may obtain publicly available information related to this action using any of the following methods:

FOR FURTHER INFORMATION CONTACT: Jenny Tobin, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone: 301-415-2328, email: Jennifer.Tobin@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

Westinghouse Electric Company, LLC (WEC) is authorized to possess and use SNM under part 70 of title 10 of the *Code of Federal Regulations* (10 CFR), "Domestic Licensing of Special Nuclear Material" at its Columbia Fuel Fabrication Facility (CFFF) located in Hopkins, South Carolina. The CFFF is licensed to possess and process enriched uranium up to a maximum of 5 weight-percent uranium-235 for the manufacture of nuclear fuel assemblies for use in commercial nuclear power reactors.

II. Discussion

Pursuant to 10 CFR 2.106, the NRC is providing notice of the renewal of License No. SNM-1107, which authorizes WEC to continue the manufacture of nuclear fuel assemblies for use in commercial nuclear power reactors at its location in Hopkins, South Carolina.

WEC's request for the license renewal was previously noticed in the **Federal Register** (FR) on February 27, 2015 (80 FR 10727), with a notice of opportunity to request a hearing and to petition for leave to intervene. No requests were received.

The NRC prepared a final Environmental Impact Statement (EIS), NUREG- 2248, "Environmental Impact Statement for the License Renewal of

the Columbia Fuel Fabrication Facility in Richland County, South Carolina" in support of WEC's license renewal application in accordance with the requirements of 10 CFR part 51. The final EIS was noticed in the **Federal Register** on August 5, 2022 (87 FR 48044).

The NRC determined that License No. SNM-1107 complies with the standards and requirements of the Atomic Energy Act of 1954, as amended, and with the NRC's rules and regulations as set forth in 10 CFR chapter 1. Accordingly, this license was issued on September 12, 2022, and was effective immediately.

The NRC staff prepared a safety evaluation report for the renewal of License No. SNM-1107 and concluded that WEC can continue to operate the facility without posing an undue risk to the worker or to public health and safety.

III. Availability of Documents

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," the details with respect to this action, including the safety evaluation report and accompanying documentation and license, are available electronically in the NRC's Electronic Reading Room at <https://www.nrc.gov/reading-rm/adams.html>. From this site, you can access ADAMS, which provides text and image files of the NRC's public documents. For further details related to this action, visit <https://www.regulations.gov> under Docket ID NRC-2015-0039.

The documents identified in the following table are available to interested persons through ADAMS accession numbers as indicated.
