The properties of the materials studied include but are not limited to grain structure, grain boundary and interstitial defects, and morphology. These properties are not only studied at ambient environments but also under high pressure, temperature, stress and strain.

*Docket Number:* 22–004. Applicant: UChicago Argonne LLC, Operator of Argonne National Laboratory, 9700 South Cass Avenue, Lemont, IL (U.S.A.) 60439–4873. Instrument: High Energy Monochromators. Manufacturer: Strumenti Scientific CINEL S.R.L., Italy. Intended Use: According to the applicant, these instruments will be used on new beamlines for the Advanced Photon Source upgrade. The monochromators are bandpass optical filters, that allow only a narrow band of wavelengths of X-rays to pass. This is critical for the needs of the beamline’s experimental purposes. The materials/ phenomena that are studied vary widely from material properties analysis, protein mapping for pharmaceutical companies, X-ray imaging and chemical composition determination. These components will be used exclusively for scientific research for a minimum of 5 years at Argonne National Laboratory. The properties of the materials studied include but are not limited to grain structure, grain boundary and interstitial defects, and morphology. These properties are not only studied at ambient environments but also under high pressure, temperature, stress and strain.

*Docket Number:* 22–005. Applicant: Cornell University, School of Civil and Environmental Engineering, Hollister Hall (2046), Room #220, 527 College Avenue, Ithaca, NY 14853–3501, USA. Instrument: Semi-automatic single cell sorter. Manufacturer: Hooke Instruments, Ltd., P.R. China. Intended Use: According to the applicant, the research will involve identifying and obtaining novel single cells based on metabolic traits that cannot be identified with simple label/staining, and in addition, we would like to obtain live cells for further culturing and investigation. We are interested in novel and non-culturable organisms/cells that possess combined traits of desire that can be detected using Raman micro-

spectroscopy fingerprinting. This unique label-free and ejection-based cell sorter is the only one known that will enable the applicant to eject the single live cell (pre-identified with non-invasive, non-damaging Raman) in complicated bioprocess/environmental (soil water) samples into collectors and then allow us to study them.

#### **Certain Passenger Vehicles and Light Truck Tires From the People’s Republic of China: Notice of Court Decision Not in Harmony With the Results of Antidumping Administrative Review; Notice of Amended Final Results; Correction**

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**ACTION:** Notice; correction.

**SUMMARY:** The U.S. Department of Commerce (Commerce) published notice in the **Federal Register** of June 3, 2022, in which Commerce announced the amended final results of the 2015–2016 administrative review of the antidumping duty (AD) order on certain passenger vehicle and light truck tires (passenger tires), following a final decision by the U.S. Court of International Trade which was not in harmony with the underlying final results of that review. In that notice, Commerce incorrectly labeled the headers of two tables setting forth the weighted-average dumping margins applicable in the amended final results as “Producer/Exporter,” instead of labeling them as “Exporter.” In addition, Commerce incorrectly separated certain entities in the first table, instead of listing them together. We are correcting these inadvertent errors with this notice, as described below.

Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3797.

#### **SUPPLEMENTARY INFORMATION:**

##### **Correction**

In the **Federal Register** of June 3, 2022, in FR Doc 2022–11939, on pages 33718 and 33719, in the first column of each table, correct the header from “Producer/Exporter” to “Exporter.” In addition, on page 33719, in the first column of the first table, correct the list of entities by combining Sailun Jinyu Group Co., Ltd.; Sailun Jinyu Group (Hong Kong) Co., Limited; Shandong Jinyu Industrial Co., Ltd.; Sailun Tire International Corp.; Seatex International Inc.; Dynamic Tire Corp.; and Husky Tire Corp. together, rather than on separate lines.

##### **Background**

On June 3, 2022, Commerce published in the **Federal Register** the amended final results of the 2015–2016 administrative review of the order on passenger tires from the People’s Republic of China.<sup>1</sup> We incorrectly labeled the headers in two tables setting forth the weighted-average dumping margins determined in that review as “Producer/Exporter,” instead of “Exporter.” In addition, we incorrectly separated certain entities in the first table, instead of listing them together as determined in the underlying investigation.<sup>2</sup> The corrected tables are below:
