

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541, 45 CFR 671), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas as requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

Application Details

Permit Application: 2023–010

1. Applicant

Becky Ball, School of Mathematical and Natural Sciences, Arizona State University, Glendale, AZ 85306.

Activity for Which Permit is Requested

Take, Enter Antarctic Specially Protected Area (ASPAs), Import to USA. The applicant plans to take up to 117 (500 gram) soil samples, 36 samples of the plant *Deschampsia antarctica*, 72 moss samples, and 36 cyanobacterial mat samples per year from 4 locations on King George Island, Robert Island, and the Antarctic Peninsula. This project will develop understanding of plant functional traits and their role in succession during glacial retreat in terrestrial Antarctica. The applicant plans to conduct sampling and soil respiration experiments at sites near to ASPA 151, ASPA 112, ASPA 125, ASPA 150, ASPA 128, and ASPA 134 with sampling occurring within the ASPA only if suitable sites cannot be accessed outside of the ASPA boundary. The applicant plans to import soil and plant samples into the USA for study at the home institutions.

Location

ASPA 112—Coppermine Peninsula, Robert Island, South Shetland Islands; ASPA 125—Fildes Peninsula, King George Island; ASPA 128—Western shore of Admiralty Bay, King George Island, South Shetland Islands; ASPA 134—Cierva Point and offshore islands, Danco Coast, Antarctic Peninsula; ASPA 150—Ardley Island, Maxwell Bay, King George Island; ASPA 151—Lions Rump, King George Island, South Shetland Islands.

Dates of Permitted Activities

1 December 2022–31 March 2024.

Permit Application: 2023–013

2. Applicant

Dr. Heather Lynch, Stony Brook University, IACS 163, Stony Brook, NY 11794.

Activity for Which Permit is Requested

Waste Management. The applicant seeks an Antarctic Conservation Act waste management permit for activities associated with penguin population surveys in the Western Antarctic Peninsula and the South Shetland Islands. The applicant proposes using battery-powered, quadrotor unmanned aerial vehicles (UAVs) to assist in the collection of imagery data for a multi-scale population census of penguin colonies. Mitigation measures will be put in place to prevent loss of aircraft. These measures include UAVs being flown by a trained pilot in fair-weather conditions and having stationed observers maintain visual contact with the aircraft at all times. The applicant proposes various recovery methods in the unlikely event that an aircraft is lost over land or sea. These measures will limit any potential impacts on the Antarctic environment. The applicant seeks a waste permit to cover any accidental release that may result from UAV use.

Location

King George Island, South Shetland Islands; Western Antarctic Peninsula.

Dates of Permitted Activities

November 15, 2022–February 1, 2023.

Erika N. Davis,

Program Specialist, Office of Polar Programs.
