*Needs and Uses:* Section 73.682(d) of the Commission’s rules incorporates by reference the Advanced Television Systems Committee, Inc. (“ATSC”) Program System and Information Protocol (“PSIP”) standard “A/65C.” PSIP data is transmitted along with a TV broadcast station’s digital signal and provides viewers (via their DTV receivers) with information about the station and what is being broadcast, such as program information. The Commission has recognized the utility that the ATSC PSIP standard offers for both broadcasters and consumers (or viewers) of digital television (“DTV”).

ATSC PSIP standard A/65C requires broadcasters to provide detailed programming information when transmitting their broadcast signal. This standard enhances consumers’ viewing experience by providing detailed information about digital channels and programs, such as how to find a program’s closed captions, multiple streams and V-chip information. This standard requires broadcasters to populate the Event Information Tables (“EITs”) (or program guide) with accurate information about each event (or program) and to update the EIT if more accurate information becomes available. The previous ATSC PSIP standard A/65–B did not require broadcasters to provide such detailed programming information but only general information.
