National Agricultural Statistics Service

Title: Organic Survey.

OMB Control Number: 0535–0249.

Summary of Collection: The primary objective of the National Agricultural Statistics Service (NASS) is to prepare and issue State and national estimates of crop and livestock production, prices, and disposition as well as economic statistics, farm numbers, land values, on-farm pesticide usage, pest crop management practices, as well as the Census of Agriculture. Originally, the Organic Survey was designed to be conducted once every five years as a mandatory, follow-on-survey to the 2007 Census of Agriculture and then every five years after that. In 2011, the docket was renewed to include that the survey was changed to accommodate a cooperative agreement between NASS and the USDA Risk Management Agency (RMA). Specifically, the survey was changed to a voluntary survey that was to be conducted annually if funding permitted, and it would allow for a rotation of target crops each year. With the completion of the 2012 Census of Agriculture, NASS renewed the Organic Survey again and returned it to its' original scope of questions and the mandatory reporting requirement. After the completion of the 2014 Organic Survey, NASS renewed its' cooperative agreement with RMA to conduct the shorter questionnaire on an annual basis.

Food and Nutrition Service

Title: FNS Generic Clearance for the FNS Fast Track Clearance for the Collection of Routine.

OMB Control Number: 0584–0611.

Summary of Collection: Executive Order 12862 directs Federal agencies to provide service to the public that matches or exceeds the best service available in the private sector. Executive Order 14058 (12/13/21) discusses that government must work to deliver services more equitably and effectively, especially for those who have been historically underserved. It addresses transforming federal customer experience and service delivery to rebuild trust in government. In order to work continuously to ensure that our programs are effective and meet our customers' needs, Food and Nutrition Service (FNS) (hereafter “the Agency”) seeks to obtain OMB approval for the extension of a generic clearance to collect qualitative feedback on our service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study.

Need and Use of the Information:

This feedback will continue to: (1) provide insights into customer or stakeholder perceptions, experiences and expectations, (2) provide an early warning of issues with service and, (3) focus attention on areas where communication, training or changes in operations might improve delivery of products or services. This collection allows for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It also allows feedback to contribute directly to the improvement of program management.

The solicitation of feedback targets areas such as: timeliness, appropriateness, accuracy of information, courtesy, efficiency of service delivery, and resolution of issues with service delivery. Responses are assessed to plan and inform efforts to improve or maintain the quality of service offered to the public. If this information is not collected, vital feedback from customers and
