

from an estimated 334,472 average annual hours in the previous ICR renewal to an estimated 38,625 average annual hours in this renewal. This ICR renewal was updated to reflect the review of available information gathered while moving the program submissions from EPA Regions to a central location at EPA HQ. The previous ICRs had overestimated the burden on both industry and governments. The typical facility does not make an average of eight separate submissions, as previously estimated, but rather, one. While the burden to generate a CRRR submission remains the same, the overall submissions and number of chemicals reported are reduced. This reduces the labor burden for both industry and governments.

## ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OAR-2022-0039; FRL-10256-01-OMS]

### Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Area Sources: Primary Copper Smelting, Secondary Copper Smelting, and Primary Nonferrous Metals-Zinc, Cadmium, and Beryllium (Renewal)

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Area Sources: Primary Copper Smelting, Secondary Copper Smelting, and Primary Nonferrous Metals-Zinc, Cadmium, and Beryllium (EPA ICR Number 2240.08, OMB Control Number 2060-0596), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through November 30, 2022. Public comments were previously requested via the **Federal Register** on April 8, 2022, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to a

collection of information unless it displays a currently valid OMB control number.

**DATES:** Additional comments may be submitted on or before October 31, 2022.

**ADDRESSES:** Submit your comments, referencing Docket ID Number EPA-HQ-OAR-2022-0039, online using <https://www.regulations.gov/> (our preferred method), by email to [docket@epa.gov](mailto:docket@epa.gov), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. The EPA's policy is that all comments received will be included in the public docket without change, including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

#### FOR FURTHER INFORMATION CONTACT:

Muntasir Ali, Sector Policies and Program Division (D243-05), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541-0833; email address: [ali.muntasir@epa.gov](mailto:ali.muntasir@epa.gov).

#### SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at <https://www.regulations.gov/>, or in person at the EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

**Abstract:** The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Area Sources: Primary Copper Smelting, Secondary Copper Smelting, and Primary Nonferrous Metals-Zinc, Cadmium, and Beryllium (40 CFR part 63, subparts EEEEE, FFFFFFF, and GGGGGG), apply to both new and existing primary copper smelting facilities (Subpart EEEEE),

new secondary copper smelting facilities (Subpart FFFFFFF), and both new and existing primary zinc or beryllium production facilities (Subpart GGGGGG) that are an area source of hazardous air pollutant (HAP) emissions. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to the NESHAP.

**Form Numbers:** None.

**Respondents/affected entities:**

Owners and operators of new and existing primary copper smelting facilities, new secondary copper smelting facilities, and new and existing primary zinc or beryllium production facilities that are area sources of HAP.

**Respondent's obligation to respond:**

Mandatory (40 CFR part 63, subparts EEEEE, FFFFFFF, and GGGGGG).

**Estimated number of respondents:** 3 (total).

**Frequency of response:** Initially.

**Total estimated burden:** 41 hours (per year). Burden is defined at 5 CFR 1320.3(b).

**Total estimated cost:** \$4,970 (per year), includes no annualized capital/startup and/or operation & maintenance costs.

**Changes in the Estimates:** The decrease in burden from the most-recently approved ICR is due to an adjustment(s). The adjustment decrease in burden from the most recently approved ICR is due to an updated respondent count that showed fewer primary copper sources than were estimated in the most-recently approved ICR. This count is based on data collected during a recently proposed rulemaking for primary copper smelting area sources (87 FR 1616; January 11, 2022), and better reflects the current industry. Because the proposed rulemaking is not yet finalized, this ICR renewal reflects the burden of the recordkeeping and reporting requirements of the existing regulation. There are no capital/startup vs. operation and maintenance (O&M) costs for the affected sources.
