ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2022–0047; FRL–10259–01–OMS]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NSPS for Greenhouse Gas Emissions for New Electric Utility Generating Units (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), NSPS for Greenhouse Gas Emissions for New Electric Utility Generating Units (EPA ICR Number 2465.05, OMB Control Number 2060–0685), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through November 30, 2022. Public comments were previously requested, via the **Federal Register**, on April 8, 2022 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before October 31, 2022.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OAR–2022–0047, to: (1) EPA online using <https://www.regulations.gov/> (our preferred method), or by email to docket@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW,

Washington, DC 20460. The EPA’s policy is that all comments received will be included in the public docket without change, including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Muntasir Ali, Sector Policies and Program Division (D243–05), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina, 27711; telephone number: (919) 541–0833; email address: ali.muntasir@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at <https://www.regulations.gov>, or in person at the EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA’s public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The New Source Performance Standards (NSPS) for Greenhouse Gas Emissions for New Electric Utility Generating Units were proposed on June 2, 2014 and promulgated on October 23, 2015. Amendments to 40 CFR part 60, subpart TTTT were proposed on December 6, 2018, but EPA did not finalize amendments to the 2015 final rule. On January 13, 2021, EPA finalized a pollutant-specific significant contribution finding for this source category, which was later vacated and remanded on April 5, 2021. These regulations apply to either newly constructed, modified or reconstructed facilities with electric utility generating units (EGUs), including any steam generating unit, IGCC, or stationary combustion turbine that commenced construction after January 8, 2014 or commenced reconstruction after June 18, 2014. To be considered an EGU the unit must be: (1) capable of combusting

more than 250 MMBtu/h heat input of fossil fuel; and (2) serve a generator capable of supplying more than 25 MW net to a utility distribution system (*i.e.*, for sale to the grid). New facilities include those that commenced construction, modification or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 60, subpart TTTT. In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Form Numbers: None.

Respondents/affected entities: Electric utility generating units.

Respondent’s obligation to respond: Mandatory (40 CFR part 60, subpart TTTT).

Estimated number of respondents: 92 (total).

Frequency of response: Initially, quarterly.

Total estimated burden: 3,130 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$376,000 (per year), which includes no annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: The increase in burden from the most recently approved ICR is due to an adjustment(s). The adjustment increase in burden from the most-recently approved ICR is due to an increase in the number of respondents. Based on our consultation with the Agency’s internal industry experts and review of data from EPA’s Clean Air Markets Division and the U.S. Energy Information Administration, the electric utility sector is undergoing significant changes and the number of respondents and new sources expected over the next three years has increased significantly from the most recently approved ICR.

Although we are assuming there will be 16 new sources per year subject to 40 CFR part 60, subpart TTTT, there is no change in the capital/startup vs. operation and maintenance (O&M) costs as discussed in section 6(b)(iii) compared with the costs in the most-recently approved ICR. There are no capital/startup and/or O&M costs for this ICR. As described in a previous **Federal Register** notice (84 FR 25046), this NSPS imposes a minimal information collection burden on affected sources beyond what sources would already be subject to under the authorities of CAA Parts 75 (Acid Rain Program CEM requirements) and 98

(Mandatory GHG Reporting, applicable to EGUs that capture CO₂). OMB has previously approved the information collection requirements contained in the existing Part 75 and 98 regulations (40 CFR part 75 and 40 CFR part 98) under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, and has assigned OMB control numbers 2060–0626 and 2060–0629, respectively. Apart from certain reporting costs to comply with the emission standards under the rule, there are no additional information collection costs, as the information required by the rule is already collected and reported by other regulatory programs.

Courtney Kerwin,

Director, Regulatory Support Division.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request, Distribution of Offsite Consequence Analysis Information Under the Clean Air Act (CAA), as Amended

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), “Distribution of Offsite Consequence Analysis Information under Section 112(r)(7)(H) of the Clean Air Act (CAA), as amended,” (EPA ICR No. 1981.08, OMB Control No. 2050–0172) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through November 30, 2022. Public comments were previously requested via the **Federal Register** on March 1, 2022 (87 FR 11425). EPA received no comments during the 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Comments must be submitted on or before October 31, 2022.

ADDRESSES: Submit your comments, referencing Docket ID No. EPA–HQ–OAR–2003–0073, to (1) EPA online using www.regulations.gov (our preferred method), or by mail to EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460, and (2) OMB via email to oir_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA. EPA’s policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Wendy Hoffman, Office of Emergency Management, Mail Code 5104A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564–8794; email address: hoffman.wendy@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA’s public docket, visit <http://www.epa.gov/dockets>.

Abstract: Pursuant to section 3506(c)(2)(A) of the PRA, in the first FR notice (87 FR 11425) published on March 1, 2022, EPA solicited comments and information pertaining to the distribution of offsite consequence analysis information under the accidental release prevention requirements; Risk Management Programs under the Clean Air Act Section 112(r)(7). The regulations include requirements for submittal of a Risk Management Plan (RMP) to EPA, which includes information on offsite consequence analysis (OCA) as well as other elements of the Risk Management Program.

The Chemical Safety Information, Site Security, and Fuels Regulatory Relief Act (CSISSFRRRA), published on August 4, 2000 (65 FR 48108), required the President, who delegated to EPA and the Department of Justice (DOJ), the responsibility to promulgate regulations on the distribution of OCA information,

imposed minimal information and recordkeeping requirements.

In accordance with the final rule, the Federal Government established 55 reading rooms at Federal facilities geographically distributed across the United States and its territories, where the public may read, but not mechanically copy or remove, paper copies of OCA information for up to 10 stationary sources per calendar month. The public may also obtain OCA information that the Local Emergency Planning Committee (LEPC) in whose jurisdiction the requestor lives or works, is authorized to provide.

The final rule also authorizes and encourages State and local government officials to access OCA information for their official use, and to provide the public with read-only access to OCA sections of RMPs for sources located within the jurisdiction of the LEPC where the person lives or works and for any other stationary sources with vulnerability zones extending into the LEPC’s jurisdiction.

EPA also established a Vulnerable Zone Indicator System (VZIS) which informs any person located in any state whether an address specified by that person might be within the vulnerable zone of one or more stationary sources, according to the data reported in RMPs. The VZIS is available on the internet. Members of the public who do not have access to the internet are able to obtain the same information by regular mail request to the EPA. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA’s regulations in 40 CFR are listed in 40 CFR part 9.

Form Numbers: None.

Respondents/affected entities: State and local agencies and the public.

Respondent’s obligation to respond: Required to obtain or retain a benefit (40 CFR 1400).

The annual respondent universe for this ICR is 315 state and local agencies, LEPCs and individuals (public). The total includes 15 State agencies and three LEPCs that send EPA letters of request for OCA data, five states that experience reading room visits, and three LEPCs that hold five public meetings each year. The public component of the total includes 15 individuals who visit Federal and State reading rooms each year and 262 individuals who request VZIS data. The three LEPCs that hold public meetings are assumed to be the same three LEPCs that send letters of request for OCA data.
