

including the validity of the methodology and assumptions used;

- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of this information collection:

1. *Type of Information Collection:*

Extension of a currently approved collection.

2. *The Title of the Form/Collection:* Law Enforcement Officers Killed or Assaulted (LEOKA)

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* Form Number: LEOKA Form 1–705. The applicable component within the Department of Justice is the Criminal Justice Information Services Division, Federal Bureau of Investigation, Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:*

City, county, state, tribal, territory and federal law enforcement agencies. Abstract: Under Title 28, U.S. Code 534, Acquisition, Preservation, and Exchange of Identification Records; Appointments of Officials, 1930, this collection requests Law Enforcement Officers Killed or Assaulted data from city, county, state, federal, and tribal law enforcement agencies in order for the FBI's UCR Program to serve as the national clearinghouse for the collection and dissemination of crime data and to publish these statistics in the Law Enforcement Officers Killed or Assaulted (LEOKA) annual publication.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* There are approximately 18,600 law enforcement agencies within the universe of potential respondents. Due to the recent National Incident-Based Reporting System (NIBRS) transition, the FBI's UCR Program is no longer accepting new monthly submissions for LEOKA data using this clearance but will accept updates to Summary Reporting System submissions for incidents occurring prior to 2021. The submission of updates to past data is strictly voluntary and at the discretion of the contributing agency. Based on current reporting patterns, the FBI's UCR Program has

received 64,734 LEOKA update submissions since January 1, 2021, with an estimated response time of 7 minutes per response on this form. As more agencies transition to NIBRS, it is expected that the total number of updates will steadily decline, mainly due to updates being submitted through NIBRS on a more frequent basis. However, due to the need for these updates, the burden hour estimate is based on the most recent submission volumes to achieve the highest possible burden estimate.

6. *An estimate of the total public burden (in hours) associated with the collection:* There are approximately 7,552.3 hours, annual burden, associated with this information collection.

If additional information is required contact: Robert Houser, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, Department of Justice, Two Constitution Square, 145 N Street NE, 3E.206, Washington, DC 20530.

Dated: September 26, 2022.

Robert Houser,

Department Clearance Officer for PRA, Policy and Planning Staff, Office of the Chief Information Officer, U.S. Department of Justice.

BILLING CODE 4410–02–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[OMB Control No. 1219–0014]

Proposed Extension of Information Collection; Hazardous Conditions Complaints

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Request for public comments.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Mine Safety and Health Administration

(MSHA) is soliciting comments on the information collection for Hazardous Conditions Complaints.

DATES: All comments must be received on or before November 29, 2022.

ADDRESSES: Comments concerning the information collection requirements of this notice may be sent by any of the methods listed below.

- *Federal E-Rulemaking Portal:* <http://www.regulations.gov>. Follow the on-line instructions for submitting comments for docket number MSHA–2022–0044.

- *Mail/Hand Delivery:* Mail or visit DOL–MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452. Before visiting MSHA in person, call 202–693–9455 to make an appointment, in keeping with the Department of Labor's COVID–19 policy. Special health precautions may be required.

- MSHA will post your comment as well as any attachments, except for information submitted and marked as confidential, in the docket at <https://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances, MSHA, at MSHA.information.collections@dol.gov (email); (202) 693–9440 (voice); or (202) 693–9441 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal and metal and nonmetal mines.

Under Section 103(g) of Mine Act, a representative of miners, or any individual miner where there is no representative of miners, may submit a written or oral notification of an alleged violation of the Mine Act or a mandatory standard or that an imminent danger exists. The notifier has the right to obtain an immediate inspection by MSHA. A copy of the notice must be provided to the operator, with individual miner names redacted.

MSHA regulations at 30 CFR 43 implement section 103(g) of the Mine Act. These regulations provide the

procedures for submitting notification of the alleged violation and the actions that MSHA must take after receiving the notice. Although the regulations contain a review procedure (required by section 103(g)(2) of the Mine Act) whereby a miner or a representative of miners may request a review in writing if no citation or order is issued as a result of the original notice, the option is so rarely used that it was not considered in the burden estimates.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Hazardous Conditions Complaints. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

The information collection request will be available on <http://www.regulations.gov>. MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on www.regulations.gov and www.reginfo.gov.

The public may also examine publicly available documents at DOL-MSHA, Office of Standards, Regulations, and Variances, 201 12th South, Suite 4E401, Arlington, VA 22202-5452. Sign in at the receptionist's desk on the 4th floor via the East elevator. Before visiting MSHA in person, call 202-693-9455 to make an appointment, in keeping with the Department of Labor's COVID-19 policy. Special health precautions may be required.

Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION** section of this notice.

III. Current Actions

This request for collection of information contains provisions for Hazardous Conditions Complaints. MSHA has updated the data with respect to the number of respondents, responses, burden hours, and burden costs supporting this information collection request.

Type of Review: Extension, without change, of a currently approved collection.

Agency: Mine Safety and Health Administration.

OMB Number: 1219-0014.

Affected Public: Business or other for-profit.

Number of Respondents: 1,785.

Frequency: On occasion.

Number of Responses: 1,785.

Annual Burden Hours: 357 hours.

Annual Respondent or Recordkeeper Cost: \$0.

MSHA Forms: Hazardous Condition Complaint.

Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Song-Ae Aromie Noe,

Certifying Officer.

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor (Secretary) to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal and metal and nonmetal mines.

Underground mines usually present harsh and hostile working environments. The ventilation system is the most vital life support system in underground mining and a properly operating ventilation system is essential for maintaining a safe and healthful working environment. A well planned mine ventilation system is necessary to ensure a fresh air supply to miners at all working places, to control the amounts of harmful airborne contaminants in the mine atmosphere, and to dilute possible accumulation of explosive gases.
