

materials be forwarded before the meeting to Ms. Springer.

The Assistant Secretary for Administration, with the concurrence of the General Counsel, formally determined on January 25, 2022, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. app. 2 10(d)), that the portion of the meeting dealing with pre-decisional changes to the Commerce Control List and the U.S. export control policies shall be exempt from the provisions relating to public meetings found in 5 U.S.C. app. 10(a)(1) and 10(a)(3). The remaining portions of the meeting will be open to the public. For more information, please contact Yvette Springer via email.

**Yvette Springer,**  
Committee Liaison Officer.

#### Certain Biaxial Integral Geogrid Products From the People's Republic of China: Continuation of Antidumping Duty Order and Countervailing Duty Order

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** As a result of the determinations by the U.S. Department of Commerce (Commerce) and the U.S. International Trade Commission (ITC) that revocation of the antidumping duty (AD) and countervailing duty (CVD) orders on certain biaxial integral geogrid products (geogrids) from the People's Republic of China (China) would likely lead to continuation or recurrence of dumping, countervailable subsidies, and material injury to an industry in the United States, Commerce is publishing a notice of continuation of the AD and CVD orders.

**DATES:** Applicable October 12, 2022.

**FOR FURTHER INFORMATION CONTACT:** Kabir Archuleta, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-2593.

#### SUPPLEMENTARY INFORMATION:

##### Background

On March 3, 2017, Commerce published the AD and CVD orders on

geogrids from China.<sup>1</sup> On February 1, 2022, the ITC instituted,<sup>2</sup> and Commerce initiated, the first sunset reviews of the *Orders*, pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).<sup>3</sup> As a result of its reviews, Commerce determined that revocation of the *Orders* would likely lead to continuation or recurrence of dumping and countervailable subsidies and, therefore, notified the ITC of the magnitude of the margins and net countervailable subsidy rates likely to prevail should the *Orders* be revoked.<sup>4</sup>

On October 4, 2022, the ITC published its determination, pursuant to sections 751(c) and 752(a) of the Act, that revocation of the *Orders* would likely lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.<sup>5</sup>

#### Scope of the Orders

The products covered by the scope are certain biaxial integral geogrid products. Biaxial integral geogrid products are a polymer grid or mesh material (whether or not finished, slit, cut-to-length, attached to woven or non-woven fabric or sheet material, or packaged) in which four-sided openings in the form of squares, rectangles, rhomboids, diamonds, or other four-sided figures predominate. The products covered have integral strands that have been stretched to induce molecular orientation into the material (as evidenced by the strands being thinner in width toward the middle between the junctions than at the junctions themselves) constituting the sides of the openings and integral junctions where the strands intersect. The scope includes products in which four-sided figures predominate whether or not they also contain additional strands intersecting the four-sided figures and whether or not the inside corners of the

four-sided figures are rounded off or not sharp angles. As used herein, the term "integral" refers to strands and junctions that are homogenous with each other. The products covered have a tensile strength of greater than 5 kilonewtons per meter (kN/m) according to American Society for Testing and Materials (ASTM) Standard Test Method D6637/D6637M in any direction and average overall flexural stiffness of more than 100,000 milligram-centimeter according to the ASTM D7748/D7748M Standard Test Method for Flexural Rigidity of Geogrids, Geotextiles and Related Products, or other equivalent test method standards.

Subject merchandise includes material matching the above description that has been finished, packaged, or otherwise further processed in a third country, including by trimming, slitting, coating, cutting, punching holes, stretching, attaching to woven or nonwoven fabric or sheet material, or any other finishing, packaging, or other further processing that would not otherwise remove the merchandise from the scope of the *Orders* if performed in the country of manufacture of the biaxial integral geogrid.

The products subject to the scope are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under the following subheading: 3926.90.9995. Subject merchandise may also enter under subheadings 3920.20.0050 and 3925.90.0000. The HTSUS subheadings set forth above are provided for convenience and U.S. Customs purposes only. The written description of the scope is dispositive.

#### Continuation of the Orders

As a result of the determinations by Commerce and the ITC that revocation of the *Orders* would likely lead to a continuation or a recurrence of dumping and countervailable subsidies, as well as material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act, Commerce hereby orders the continuation of the *Orders*. U.S. Customs and Border Protection will continue to collect AD and CVD cash deposits at the rates in effect at the time of entry for all imports of subject merchandise.

The effective date of the continuation of the *Orders* will be the date of publication in the **Federal Register** of this notice of continuation. Pursuant to section 751(c)(2) of the Act, Commerce intends to initiate the next five-year reviews of the *Orders* not later than 30 days prior to the fifth anniversary of the effective date of continuation.

<sup>2</sup> See *Biaxial Integral Geogrid Products from China; Institution of Five-Year Reviews*, 87 FR 5508 (February 1, 2022).

<sup>3</sup> See *Initiation of Five-Year (Sunset) Reviews*, 87 FR 5467 (February 1, 2022).

<sup>4</sup> See *Certain Biaxial Integral Geogrid Products from the People's Republic of China: Final Results of the Expedited First Sunset Review of Antidumping Duty Order*, 87 FR 34847 (June 8, 2022); and *Certain Biaxial Integral Geogrid Products from the People's Republic of China: Final Results of the Expedited First Sunset Review of the Countervailing Duty Order*, 87 FR 31521 (May 24, 2022).

<sup>5</sup> See *Biaxial Integral Geogrid Products from China*, 87 FR 60199 (October 4, 2022).

## Administrative Protective Order

This notice serves as the only reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of the APO is a sanctionable violation.

## Notification to Interested Parties

These five-year sunset reviews and this notice are in accordance with section 751(c) of the Act and published in accordance with section 777(i)(1) of the Act and 19 CFR 351.218(f)(4).

Dated: October 5, 2022.

**Lisa W. Wang,**

*Assistant Secretary for Enforcement and Compliance.*

### Certain Steel Nails From the United Arab Emirates: Final Results of Antidumping Duty Administrative Review; 2020-2021

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** The U.S. Department of Commerce (Commerce) determines that certain steel nails from the United Arab Emirates were sold in the United States at less than normal value during the period of review (POR) May 1, 2020, through April 30, 2021.

**DATES:** Applicable October 12, 2022.

#### FOR FURTHER INFORMATION CONTACT:

Brittany Bauer or Kelsie Hohenberger, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-3860 or (202) 482-2517, respectively.

#### SUPPLEMENTARY INFORMATION:

## Background

On June 7, 2022, Commerce published the *Preliminary Results*.<sup>1</sup> We invited interested parties to comment.<sup>2</sup> This review covers one respondent: Middle East Manufacturing Steel LLC/Master Nails and Pins Manufacturing, LLC (MEM/Master).<sup>3</sup> No party commented on the *Preliminary Results*, and the final results remain unchanged from the *Preliminary Results*.

Commerce conducted this review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

## Scope of the Order<sup>4</sup>

The merchandise covered by the *Order* includes certain steel nails having a shaft length up to 12 inches. Certain steel nails include, but are not limited to, nails made of round wire and nails that are cut. Certain steel nails may be of one piece construction or constructed of two or more pieces. Certain steel nails may be produced from any type of steel, and have a variety of finishes, heads, shanks, point types, shaft lengths and shaft diameters. Finishes include, but are not limited to, coating in vinyl, zinc (galvanized, whether by electroplating or hot-dipping one or more times), phosphate cement, and paint. Head styles include, but are not limited to, flat, projection, cupped, oval, brad, headless, double, countersunk, and sinker. Shank styles include, but are not limited to, smooth, barbed, screw threaded, ring shank and fluted shank styles. Screw-threaded nails subject to the *Order* are driven using direct force and not by turning the fastener using a tool that engages with the head. Point styles include, but are not limited to diamond, blunt, needle, chisel and no point. Certain steel nails may be sold in bulk, or they may be collated into strips

<sup>1</sup> See *Certain Steel Nails from the United Arab Emirates: Preliminary Results of Antidumping Duty Administrative Review; 2020-2021*, 87 FR 34637 (June 7, 2022) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum.

<sup>2</sup> *Id.*, 87 FR at 34639.

<sup>3</sup> Commerce selected two mandatory respondents for individual examination in this review: Middle East Manufacturing Steel LLC and Master Nails and Pins Manufacturing, LLC. We find, however, that it is appropriate to treat the companies as a single entity. See Memoranda, "Antidumping Duty Administrative Review of Certain Steel Nails from the United Arab Emirates: Middle East Manufacturing Steel LLC and Master Nails and Pins Manufacturing LLC—Preliminary Affiliation and Single Entity Treatment," dated May 31, 2022; and "Administrative Review of Antidumping Duty Order on Certain Steel Nails from the United Arab Emirates: Respondent Selection," dated August 13, 2021.

<sup>4</sup> See *Certain Steel Nails from the United Arab Emirates: Amended Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order*, 77 FR 27421 (May 10, 2012) (*Order*).

or coils using materials such as plastic, paper, or wire.

Certain steel nails subject to the *Order* are currently classified under the Harmonized Tariff Schedule of the United States (HTSUS) subheadings 7317.00.55, 7317.00.65, and 7317.00.75.

Excluded from the scope of the *Order* are steel nails specifically enumerated and identified in ASTM Standard F 1667 (2011 revision) as Type I, Style 20 nails, whether collated or in bulk, and whether or not galvanized. Also excluded from the scope of the *Order* are the following products:

- non-collated (*i.e.*, hand-drive or bulk), two-piece steel nails having plastic or steel washers ("caps") already assembled to the nail, having a bright or galvanized finish, a ring, fluted or spiral shank, an actual length of 0.500" to 8", inclusive; an actual shank diameter of 0.1015" to 0.166", inclusive; and an actual washer or cap diameter of 0.900" to 1.10", inclusive;
- non-collated (*i.e.*, hand-drive or bulk), steel nails having a bright or galvanized finish, a smooth, barbed or ringed shank, an actual length of 0.500" to 4", inclusive; an actual shank diameter of 0.1015" to 0.166", inclusive; and an actual head diameter of 0.3375" to 0.500", inclusive;
- wire collated steel nails, in coils, having a galvanized finish, a smooth, barbed or ringed shank, an actual length of 0.500" to 1.75", inclusive; an actual shank diameter of 0.116" to 0.166", inclusive; and an actual head diameter of 0.3375" to 0.500", inclusive;
- non-collated (*i.e.*, hand-drive or bulk), steel nails having a convex head (commonly known as an umbrella head), a smooth or spiral shank, a galvanized finish, an actual length of 1.75" to 3", inclusive; an actual shank diameter of 0.131" to 0.152", inclusive; and an actual head diameter of 0.450" to 0.813", inclusive;
- corrugated nails. A corrugated nail is made of a small strip of corrugated steel with sharp points on one side;
- thumb tacks, which are currently classified under HTSUS 7317.00.10.00;
- fasteners suitable for use in powder-actuated hand tools, not threaded and threaded, which are currently classified under HTSUS 7317.00.20 and 7317.00.30;
- certain steel nails that are equal to or less than 0.0720 inches in shank diameter, round or rectangular in cross section, between 0.375 inches and 2.5 inches in length, and that are collated with adhesive or polyester film tape backed with a heat seal adhesive; and
- fasteners having a case hardness greater than or equal to 50 HRC, a carbon content greater than or equal to
