

avoid pieces of flying debris from the blown tire and crash their vehicles. The TPMS detection requirements were established to reduce the possibility of any negative consequences due to underinflated tires. The Agency established the requirement that the driver be given a warning when tire pressure is 25 percent or more below the vehicle manufacturer's recommended cold tire inflation pressure. This low-tire pressure threshold, combined with the corresponding 20-minute limit to notify vehicle operators of this condition, was created to facilitate warning drivers of significant underinflation of tires to prevent resulting safety problems.

VIII. NHTSA's Decision

In consideration of the foregoing, NHTSA has decided that Volkswagen has not met its burden of persuasion that the subject FMVSS No. 138 noncompliance is inconsequential to motor vehicle safety. Accordingly, Volkswagen's petition is hereby denied, and Volkswagen is consequently obligated to provide notification of and free remedy for that noncompliance under 49 U.S.C. 30118 and 30120.
