Overview of This Information Collection

1. *Type of Information Collection:* Extension of a currently approved collection.

2. *Title of the Form/Collection:* Return A—Monthly Return of Offenses Known to Police and Supplement to Return A—Monthly Return of Offenses Known to Police and Supplement of Return A—Monthly Return of Offenses Known to Police.

3. *Agency form number, if any, and the applicable component of the Department sponsoring the collection:* Form Number: 1-720 and 1-706. Sponsor: Criminal Justice Information Services Division, Federal Bureau of Investigation, Department of Justice.

4. *Affected public will be asked or required to respond, and a brief abstract:* Federal, state, county, city, and tribal law enforcement agencies.

Abstract: This collection requests Part I offense and clearance data, and stolen and recovered monetary values of stolen property throughout the United States from federal, state, county, city, and tribal law enforcement agencies in order for the FBI's Uniform Crime Reporting (UCR) Program to serve as the national clearinghouse for the collection and dissemination of crime data and to publish these statistics in *Crime in the United States*.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond/reply:* There are approximately 18,600 law enforcement agencies within the universe of potential respondents. Due to the recent National Incident-Based Reporting System (NIBRS) transition, the UCR Program is no longer accepting new monthly submissions from *Return A* and *Supplement to Return A* data using this clearance. This clearance is being maintained to allow the submission of updates to past Summary Reporting System (SRS) submissions that were provided by agencies prior to the 2021 NIBRS transition. The submission of updates to past data is strictly voluntary and at the discretion of the contributing agency. Based on existing reporting patterns, the UCR Program has received 87,059 *Return A* and *Supplement to Return A* update submissions from 5,580 responding agencies in 2021 with an estimated response time of 10 minutes per response for *Return A* and 11 minutes for *Supplement to Return A* on this form. This number has changed from the 60-day notice due to a recalculation of the data available to the program. In order to provide a singular calculation of the estimated burden, the approximate minutes per response calculation is averaged between the *Return A* and *Supplement to Return A* forms. This results in a calculation of 10.5 minutes per response for the entire 1110-0001 clearance. The total burden for this clearance is determined by taking the 87,059 total responses received multiplied by the average minutes per response of 10.5 minutes per response. This provides a total minute of burden of 914,119.5 minutes. Converted to hours, the total number of burden hours for this collection is 15,235 hours. As the UCR Program moves further from the NIBRS transition, it is expected the total number of updates will steadily decline, mainly due to the updates being done

through NIBRS on a more frequent basis. However, due to the need for these updates, the burden hour estimate is based on the most recent submission volumes to achieve the highest possible burden estimate.

6. *An estimate of the total public burden (in hours) associated with the collection:* There are approximately 15,235 hours, annual burden, associated with this information collection.

Assistant Director, Policy and Planning Staff, Office of the Chief Information Officer, U.S. Department of Justice.
