#### Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order JO 7400.11G, Airspace Designations and Reporting Points, dated August 19, 2022, and effective September 15, 2022. FAA Order JO 7400.11G is publicly available as listed in the **ADDRESSES** section of this document. FAA Order JO 7400.11G lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

#### The Proposal

The FAA proposes an amendment to 14 CFR part 71 to establish Class E airspace extending upward from 700 feet above the surface at Franklin Field Airport, Union Springs, AL, to accommodate RNAV GPS standard instrument approach procedures (SIAPs) serving this airport.

Class E airspace designations are published in Paragraph 6005 of FAA

Order JO 7400.11G, dated August 19, 2022, and effective September 15, 2022, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in FAA Order JO 7400.11.

FAA Order JO 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

#### Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a significant regulatory action" under Executive Order 12866; (2) is not a significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

#### Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, Environmental Impacts: Policies and Procedures, prior to any FAA final regulatory action.

#### Lists of Subjects in 14 CFR Part 71

#### SUPPLEMENTARY INFORMATION:

##### Background

This petition requests that NMFS take emergency action to close the RKCSA and RKCSS to all fishing gear with bottom contact (*i.e.*, bottom trawl, pelagic trawl, pot gear and longline gear). Section 305(c)(1) of the MSA states: “If the Secretary finds that an emergency exists or that interim measures are needed to reduce overfishing for any fishery, he may promulgate emergency regulations or interim measures necessary to address the emergency or overfishing, without regard to whether a fishery management plan exists for such fishery.” NMFS’s Policy Guidelines for the Use of Emergency Rules require that an emergency must exist and that NMFS have an administrative record justifying emergency regulatory action and demonstrating compliance with the MSA and the National Standards (see NMFS Procedure 01–101–07; 62 FR 44421, August 21, 1997). Emergency rulemaking is intended for circumstances that are “extremely urgent,” where “substantial harm to or disruption of the . . . fishery . . . would be caused in the time it would take to follow standard rulemaking procedures (62 FR 44421, August 21, 1997).”

Under NMFS’s Policy Guidelines for the Use of Emergency Rules, the phrase “an emergency exists involving any fishery” is defined as a situation that meets the following three criteria:

1. Results from recent, unforeseen events or recently discovered circumstances;
2. Presents serious conservation or management problems in the fishery; and
3. Can be addressed through emergency regulations for which the immediate benefits outweigh the value of advance notice, public comment, and deliberative consideration of the impacts on participants to the same extent as would be expected under the normal rulemaking process.

The RKCSA and RKCSS are areas of the Bering Sea that have been identified by the North Pacific Fishery Management Council (Council) and NMFS as important for BBRKC conservation and subject to multiple management actions over time to reduce non-directed fishery impacts to the BBRKC stock. The petitioner’s requested action would affect fisheries in the exclusive economic zone off Alaska managed under the fishery management plan (FMP) for the Bering Sea and Aleutian Islands Management Area (BSAI) King and Tanner Crab Fisheries (Crab FMP) and the FMP for Groundfish of the BSAI. The Council prepared these FMPs under the authority of the Magnuson-Stevens Act (16 U.S.C. 1801 *et seq.*). Regulations implementing the FMPs appear at 50 CFR parts 679 and 680.

The Crab FMP was approved by the Secretary of Commerce on June 2, 1989. The Crab FMP establishes a State/Federal cooperative management regime that delegates crab management to the State of Alaska with Federal oversight. State regulations are subject to the provisions of the Crab FMP, including its goals and objectives, the MSA, and other applicable Federal laws.

The abundance estimate calculated for mature female BBRKC using the eastern Bering Sea bottom trawl survey (Trawl Survey) data in 2021 and 2022 were the lowest two abundances on record since 1995. Using the data from the Trawl Survey, the State provided an abundance estimation that was below the State of Alaska regulatory harvest strategy threshold of 8.4 million mature female crab to open a directed fishery in 2021 and in 2022. As a result, the directed fishery was closed for the 2021–2022 and 2022–2023 seasons. While BBRKC are closed to directed fishing, the stock is not currently overfished or subject to overfishing.

#### Information in the Petition

NMFS received the petition on September 29, 2022. The ABSC requests that the Secretary undertake emergency rulemaking to close the RKCSA and RKCSS to all fishing gears with bottom contact from January 1, 2023 to June 30, 2023 in order to protect BBRKC and their habitat at a time of historically low crab abundance. According to the petition filed by the ABSC, the reasons such action is needed through emergency rulemaking are:

1. The RKCSA is already closed year-round to bottom trawl gear to protect BBRKC and crab habitat from fishing impacts. In addition, in years when the directed fishery is closed, the RKCSS, the additional area to the south of the
