

found at: https://www.epa.gov/system/files/documents/2022-05/updated-framework_5-2022.pdf. If eligible, applicants should download and complete the scoping questions and electronically submit them to epp@epa.gov by January 1, 2023. The scoping questions can be found within the docket or at: <https://www.epa.gov/greenerproducts/framework-assessment-environmental-performance-standards-and-ecolabels-federal>. No further responses to Sections I through IV of the Framework are required to be submitted at this time.

B. What to expect after applying?

After the application deadline closes, the EPA will issue an estimated timeline for full assessments against Sections I through IV of the Framework by product/service category within 120 days. For each category being assessed, the EPA will provide further notice and instruction to applicable applicants.

EPA may not perform a full assessment of all standards and/or ecolabels submitted for assessment due to either lack of resources or lack of alignment with Administration priorities. EPA intends for there to be other opportunities to apply for assessment in the future. The timeframe for EPA to complete the assessments will depend on the number of applicants and available resources.

C. What are other ways these assessments will be used?

The General Services Administration (GSA) is partnering with EPA in this effort to better understand the market of building/infrastructure/site project-level standards/ecolabels/certifications so it can provide this information to other agencies. Per section 436(h) of the Energy Independence and Security Act of 2007 (EISA), 42 U.S.C. 17001 *et seq.*, GSA evaluates green building certification systems and provides its findings to the Secretary of Energy who, in consultation with the Department of Defense and GSA, formally identifies the system(s) to be used across the federal government. For more information, please visit <https://www.gsa.gov/gbcertificationreview>.

IV. Paperwork Reduction Act (PRA)

According to PRA, 44 U.S.C. 3501 *et seq.*, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information that requires OMB approval under the PRA, unless it has been approved by OMB and displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the

Federal Register, are listed in 40 CFR part 9, and included on the related collection instrument or form, as applicable.

The information collection activities and estimated burdens associated with the assessment of environmental performance standards and ecolabels for federal procurement are approved by OMB pursuant to the PRA under OMB Control No. 2070-0199 (EPA ICR No. 2516.04) through September 30, 2025, unless that approval is extended or renewed prior to that date. This action does not impose any new burden or activities requiring additional OMB approval. This program involves voluntary responses as specified under 42 U.S.C 13101 and 15 U.S.C. 3701, and the annual paperwork burden for the collection associated with the full assessment against sections I through IV of the Framework is estimated to average 8.5 hours per response. For additional details, please see the Information Collection Request (ICR) document that is available in the docket.

Send any comments about the accuracy of the burden estimate, and any suggested methods for further minimizing respondent burden, including through the use of automated collection techniques, to the Director, Regulatory Support Division, Office of Mission Support (2822T), Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001. Please remember to include the OMB control number in any correspondence, but do not submit any questions to this address.

Authority: 42 U.S.C. 1310.

Dated: October 28, 2022.

Michal Freedhoff,

Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

FEDERAL DEPOSIT INSURANCE CORPORATION

Privacy Act of 1974; System of Records

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Notice of modified systems of records.

SUMMARY: Pursuant to the provisions of the Privacy Act of 1974, as amended, the Federal Deposit Insurance Corporation (FDIC) proposes to modify a current FDIC system of records titled FDIC-013, Insured Financial Institution Liquidation Records, by updating the name to FDIC-013, Financial Institution Resolution and Receivership Records to more closely reflect the records processed by this system of records; adding a new routine use to allow members of the public to locate and understand the status of their accounts; and revising the policies and practices for retention and disposal of records to describe the records retention schedules
