

(excluding cover page, DD 1494, JF-12, etc.). The Coast Guard will select proposals at its sole discretion on the basis of:

- (1) How well they communicate an understanding of, and ability to meet, the proposed CRADA's goal; and
- (2) How well they address the following criteria:
  - (a) Technical capability to support the non-Federal party contributions described; and
  - (b) Resources available for supporting the non-Federal party contributions described.

Currently, the Coast Guard is considering Zelim for participation in this CRADA, because they have a solution in place for providing an AI casualty detection system that can be used on multiple platforms using Coast Guard optical sensors. However, we do not wish to exclude other viable participants from this or future similar CRADAs.

This is a technology demonstration effort to evaluate and assess how AI detection can be utilized with Coast guard optical sensors. The goal of this CRADA is to identify and determine methods of checking effectiveness of AI systems compared to current accepted Search and Rescue standards and determine their potential use in a maritime environment by the first responder and the DHS operational components. Special consideration will be given to small business firms/ consortia, and preference will be given to business units located in the U.S.

This notice is issued under the authority of 5 U.S.C. 552(a) and 15 U.S.C. 3710(a).

Dated: October 27, 2022.
