#### SUPPLEMENTARY INFORMATION:

##### A. Need for and Use of the Information Collection

The Federal Housing Enterprises Financial Safety and Soundness Act of 1992 (Safety and Soundness Act), as amended by the Federal Housing Finance Regulatory Reform Act of 2008, Division A of the Housing and Economic Recovery Act of 2008, requires FHFA to ensure that the operations and activities of each regulated entity foster liquid, efficient, competitive, and resilient national housing finance markets.<sup>1</sup> Recognizing the significant effects that the regulated entities' potential use of fintech products and innovations could have on the mortgage market and market participants, FHFA has an interest in learning about new and emerging technologies which may have applications in the mortgage space. To obtain information from the public, FHFA plans to conduct a series of competitions called "Tech Sprints." The Tech Sprints will pose "problem statements" associated with fintech in the housing finance market and solicit innovative solutions from individuals and entities participating in the Tech Sprint. The Tech Sprint solutions will support the Agency in developing strategies for the regulated entities to advance housing finance fintech in a safe and sound, responsible, and equitable manner.<sup>2</sup>

For each Tech Sprint, FHFA intends to collect information from potential participants through a solicitation for expression of interest to participate in the Tech Sprint, as well as information collected during the Tech Sprint through the solutions to the challenge statements presented. FHFA expects participation from market participants in the housing finance industry and other industries, including without limitation technology companies, mortgage companies, academics, industry groups, and other members of the public.

##### B. Burden Estimate

FHFA estimates that two Tech Sprints will be conducted each year over the next three years. The total annualized hour burden imposed upon respondents by this information collection will be 5,000 hours, based on the following calculations:

###### 1. Applications

FHFA estimates that the average number of individuals applying to participate in each Tech Sprint over the next three years will be 500, with one response per applicant. The estimated time to complete each application is one hour. Therefore, the estimate for the total annual hour burden for all applications is 1,000 hours (500 applications × 1 hour per application × 2 Tech Sprints per year = 1,000 hours).

###### 2. Tech Sprint Participants

FHFA estimates that each Tech Sprint will have an average of 50 participants. Each participant will spend an average of 40 hours participating in the Tech Sprint. Therefore, the estimate for the total annual hour burden for all Tech Sprint participants is 4,000 hours (50 participants × 40 hours per participant × 2 Tech Sprints per year = 4,000 hours).

##### C. Public Comments Request

Written comments are requested on: (1) whether the collection of information is necessary for the proper performance of FHFA functions, including whether the information has practical utility; (2) the accuracy of FHFA's estimates of the burdens of the collection of information; (3) ways to enhance the quality, utility, and clarity of the information collected; and (4) ways to minimize the burden of the collection of information on members and project sponsors, including through the use of automated collection techniques or other forms of information technology.
