*Abstract:* The Coregonine Restoration Framework is a multiagency conservation plan for conducting the science and management actions to preserve the most abundant native fishes in the Great Lakes. To inform the science methodology of that framework, the USGS will survey Great Lakes fishery scientists from state, tribal, academic, and non-government institutions about the fishery-dependent or fishery-independent field surveys that their organizations conduct in the lakes and connecting channels. Examples of information to be collected about a fishery survey include geographic area, the time period covered, survey design, measurements collected, life stages of fish targeted, number of samples per year, and basic catch proportions for native coregonine (Coregonus sp.) fishes. This information is needed to recommend which types of native fish population and conservation models can be developed with existing survey data and identify necessary information not provided by contemporary surveys. The survey results will be published and inform analyses, and the resulting analyses will be presented in a white paper to contributing fishery institutions and management agencies.

## Change in Discount Rate for Water Resources Planning

**AGENCY:** Bureau of Reclamation, Interior.

**ACTION:** Notice of change in discount rate.

**SUMMARY:** The Bureau of Reclamation is announcing the interest rate to be used by Federal agencies in the formulation and evaluation of plans for water and related land resources is 2.50 percent for fiscal year 2023.

**DATES:** This discount rate is to be used for the period October 1, 2022, through and including September 30, 2023.

#### FOR FURTHER INFORMATION CONTACT:

Brandee Blumenthal, Bureau of Reclamation, Reclamation Law Administration Division, P.O. Box 25007, Denver, Colorado 80225; telephone (303) 445–2435; or email at bblumenthal@usbr.gov.

SUPPLEMENTARY INFORMATION: The Water Resources Planning Act of 1965 and the Water Resources Development Act of 1974 require an annual determination of a discount rate for Federal water resources planning. The discount rate for Federal water resources planning for fiscal year 2023 is 2.50 percent. The prior year's rate, as announced in the Federal Register on February 3, 2022 (87 FR 6199), was 2.25 percent for fiscal year 2022. Discounting is to be used to convert future monetary values to present values.

This rate has been computed in accordance with section 80(a), Public

Law 93-251 (88 Stat. 34), and 18 CFR 704.39, which: (1) specify that the rate will be based upon the average yield during the preceding fiscal year on interest-bearing marketable securities of the United States which, at the time the computation is made, have terms of 15 years or more remaining to maturity (average yield is rounded to nearest oneeighth percent); and (2) provide that the rate will not be raised or lowered more than one-quarter of 1 percent for any year. The U.S. Department of the Treasury calculated the specified average to be 2.7141 percent. In accordance with the Water Resource Council Rules and Regulations, the maximum adjustment allowed for the current fiscal year rate is one-quarter of one percentage point from the previous fiscal year rate, which was 2.25 percent. Therefore, the fiscal year 2023 rate is 2.50 percent.

The rate of 2.50 percent will be used by all Federal agencies in the formulation and evaluation of water and related land resources plans for the purpose of discounting future benefits and computing costs or otherwise converting benefits and costs to a common-time basis.
