SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 51.118 of title 10 of the *Code of Federal Regulations* (10 CFR) “Final environmental impact statement—

notice of availability,” the NRC is making available NUREG–2237 Supplement 1, which concerns the NRC’s FEIS for the license application submitted by Holtec to construct and operate a CISF for SNF and GTCC waste, along with a small quantity of MOX fuel, which are collectively referred to in the EIS as SNF and composed primarily of spent uranium-based fuel. The NRC published the FEIS (NUREG–2237) in the **Federal Register** on July 22, 2022 (87 FR 43905), and the U.S. Environmental Protection Agency noticed the availability of the FEIS on July 22, 2022 (87 FR 43848). Supplement 1 to NUREG–2237 updates the responses to public comments by adding responses to certain comments that were inadvertently not included in the FEIS.

II. Discussion

The NRC issued the FEIS for an application from Holtec requesting a license to authorize construction and operation of a CISF for SNF at a site located halfway between Carlsbad and Hobbs, New Mexico. The proposed CISF project would be built and operated on approximately 421 hectares (ha) [1,040 acres (ac)] of land in Lea County, New Mexico. The storage and operations area, which is a smaller land area within the full property boundary, would include 134 ha [330 ac] of disturbed land. The proposed project area is approximately 51 kilometers (km) [32 miles (mi)] east of Carlsbad, New Mexico, and 54 km [34 mi] west of Hobbs, New Mexico. The proposed action is the issuance of an NRC license authorizing a CISF to store up to 8,680 MTUs [9,568 short tons] in 500 canisters of SNF for a license period of 40 years.

After publication of the FEIS, the staff identified that two comment letters, which were submitted to the NRC during the draft EIS comment period, were inadvertently not included in Appendix D to the final EIS. The comment letters were discovered after the publication of the final EIS in July 2022. The Supplement 1 to the final EIS responds to these two comment letters and documents the NRC’s evaluation of each of these comment letters that were not included in the final EIS. While the comments do not provide new and significant information regarding the project or its environmental impacts, the NRC staff is of the opinion that, in view of the circumstances described in this notice, and in accordance with 10 CFR 51.92(c), preparation of Supplement 1 to the final EIS will further the purposes of the National Environmental Policy Act of 1969, as amended. Supplement 1 does not include any changes to impact

analysis or determinations; therefore, the recommendation in the FEIS remains the same.

Dated: October 28, 2022.

John M. Moses,

Deputy Director, Division of Rulemaking, Environmental, and Financial Support, Office of Nuclear Material Safety, and Safeguards.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-320; NRC-2022-0193]

TMI-2 Solutions, LLC; Three Mile Island Station, Unit No. 2

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing partial exemptions, with a conforming amendment, from several of the record keeping requirements in its regulations in response to a request from TMI-2 Solutions, LLC. Specifically, the licensee requested partial exemptions for certain NRC regulations which require certain records to be retained for the period specified by the appropriate regulation, license condition, or technical specifications (TS), or until termination of the license if not otherwise specified. In response to the licensee's requests, the NRC also issued a conforming amendment that revised the license to reflect the specific exemptions and associated changes in the TS.

DATES: The exemption was issued on and was effective on September 16, 2022.
