SUPPLEMENTARY INFORMATION:

MSHA requires each operator of an underground coal mine to submit a Mine Emergency Evacuation and Firefighting Program of Instruction to the MSHA District Manager for approval. Upon approval by the MSHA District Manager, the operator uses the approved instruction program to implement programs for training miners to respond appropriately to mine emergencies. MSHA uses the plans to ensure that the operator’s program will provide the required training and drills to all miners. MSHA requires the operators to certify the training and drills for each miner at the completion of each quarterly drill, annual expectations training, or other training, and that a copy be provided to the miner upon request. These certifications are used by MSHA, operators, and miners as evidence that the required training has been completed. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on June 17, 2022 (87 FR 36538).
