Title: Section 90.477(a), (b)(2), (d)(2), and (d)(3), Interconnected Systems.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions and state, local or tribal government.

Number of Respondents: 527 respondents; 527 responses.

Estimated Time per Response: .25 hours–2 hours.

Needs and Uses: The information collection requirements which govern interconnection of private land mobile radio service stations with the public switched telephone network are contained in 47 CFR 90.477(a) which requires that licensees of interconnected land stations maintain as part of their station records a detailed description of how interconnection is accomplished. The information collection requirements contained in 47 CFR 90.477(b)(2) and

(d)(2) require that at least one licensee participating in any cost sharing arrangement for telephone service must maintain cost sharing records, the costs must be distributed at least once a year, and a report of the distribution must be placed in the licensee's station records and made available to participants in the sharing arrangement and the Commission upon request. The information collection requirements contained in 47 CFR 90.477(d)(3) require that licensees in the Industrial/Business Pool and those licensees who establish eligibility pursuant to 90.20(a)(2), other than persons or organizations charged with specific fire protection activities, persons or organizations charged with specific forestry-conservation activities, or medical emergency systems in the 450–470 MHz band, and who seek to connect within 120 km (75 miles) of 25 cities specified in 90.477(d)(3), must obtain the consent of all co-channel licensees located both within 120 km of the center of the city, and with 120 km of the interconnected base station transmitter. In a December 1998 Report and Order in WT Docket Nos. 98–20 and 96–188, the Commission consolidated, revised and streamlined the Commission's rules governing the licensing application procedures for radio services licensed by the Commission's Wireless Telecommunications Bureau in order to fully implement the Universal Licensing System (ULS). As a result of the ULS rule conversions in connection with this information collection requirements contained in 47 CFR 90.477(a), interconnected systems now file all information (100 percent). Section 90.477(d)(3), interconnected systems were changed to reflect NAD83 coordinates.

The Commission collects this information in several contexts, including when determining the eligibility of applicants to participate in Commission auctions (including eligibility to claim designated entity benefits), the eligibility of parties to hold a Commission license/

authorization (including eligibility for designated entity benefits), the eligibility of parties to whom licenses/authorizations are being assigned or transferred, and the repayment by license/authorization holders of the amount of bidding credits received in Commission auctions to avoid unjust enrichment.
