

exact dates and times of these virtual public scoping meetings will be announced on the project website (<https://parkplanning.nps.gov/NCEGrizzly>) and through local and regional media. The virtual public scoping meetings will also be announced through email notification to individuals and organizations, press release, and social media.

The NPS and FWS will also seek to engage directly with Tribes. Consistent with Executive Order 13175, the NPS and FWS welcome Tribal input and are available to engage in meaningful government-to-government consultation with Tribes at their request.

The NPS and the FWS previously proposed to restore grizzly bears to the NCE and produced a draft EIS for public review and comment in 2017 (82 FR 4416, January 13, 2017). Public comments that were provided during that prior EIS process will also inform this new EIS and the development of alternatives.

Reasonable Accommodations

Persons needing reasonable accommodations to attend and participate in the virtual public scoping meetings should contact Denise Shultz (NPS) or Andrew LaValle (FWS) using one of the methods listed in **FOR FURTHER INFORMATION CONTACT** as soon as possible. To allow sufficient time to process requests, please make contact no later than 1 week before the desired virtual public meeting.

Request for Identification of Potential Alternatives, Information, and Analyses Relevant to the Proposed Action

The NPS and the FWS request comments concerning the scope of the analysis, identification of potential alternatives, and information and analyses relevant to the planning process. The NPS and the FWS will consider these comments in developing the draft EIS. Specifically, the NPS and the FWS are seeking information on:

- Potential effects that the alternatives could have on other aspects of the human environment, including ecological, aesthetic, historic, cultural, economic, social, environmental justice, or health effects;
- Other possible reasonable alternatives that the NPS and the FWS should consider, including additional or alternative avoidance, minimization, and mitigation measures;
- Approaches for managing reintroduced grizzly bears, particularly in regard to potential conflicts with human activities; and

- Other information relevant to grizzly bear restoration and its impacts on the human environment.
