SUMMARY: The Environmental Protection Agency (EPA) is planning to submit an information collection request (ICR), "U.S. Environmental Protection Agency Chrome Finishing Industry Data Collection" (EPA ICR No. 2723.01, OMB Control No. 2040-NEW) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (PRA). Before doing so, EPA is soliciting public comments on specific aspects of the proposed information collection as described below. This is a request for approval of a new collection. An agency may not conduct or sponsor, and a

person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: Under the Clean Water Act (CWA), EPA develops effluent limitations guidelines (ELGs) to limit pollutants discharged from industrial point source categories. EPA initially promulgated the Metal Finishing ELGs in 1983 and amended the regulations in 1984 and 1986. The current regulation covers wastewater discharges from facilities performing various metal finishing operations. Metal finishing is the process of changing the surface of an object, for the purpose of improving its appearance and/or durability. Metal finishing is related to electroplating, which is the production of a thin surface coating of a metal upon another by electrodeposition. EPA first promulgated the Electroplating ELGs in 1974, with amendments in 1977, 1979, 1981, and 1983. Together, the Metal Finishing and Electroplating ELGs apply to thousands of facilities which perform one or more of the following operations and discharge process wastewater directly to surface waters or indirectly to surface waters through publicly owned treatment works (POTWs): electroplating, electroless plating, anodizing, coating (including phosphating, chromating, and coloring), chemical etching and milling, and printed circuit board manufacture.

As announced in the Preliminary Effluent Guidelines Program Plan 15, published in September 2021, EPA plans to conduct a rulemaking to address Per- and Polyfluoroalkyl Substances (PFAS) discharges from a
