II. Additional Information

The NRC is issuing for public comment a DG in the NRC's "Regulatory Guide" series. This series was developed to describe methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, to explain techniques that the staff uses in evaluating specific issues or postulated events, and to describe information that the staff needs in its review of applications for permits and licenses.

The DG, entitled "Performance-Based Containment Leak Test Program," is temporarily identified by its task number, DG-1391 (ADAMS Accession No. ML22006A317).

This revision of the guide (Revision 1) addresses new guidance for implementing Option B "Performance-Based Requirements" of Appendix J, "Primary Reactor Containment Leakage Testing for Water-Cooled Power Reactors," of part 50 of title 10 of the *Code of Federal Regulations* (10 CFR). Specifically, extending Type A test intervals up to 15 years, extending Type C test intervals up to 75 months, and an update to ANSI/ANS-56.8-2020 for acceptable industry standards on technical methods and techniques for performing Types A, B, and C tests. This proposed revised guide contains information specific for a leakage rate testing program for both older plants and newer reactors licensed under both 10 CFR parts 50 and 52.

The staff is also issuing for public comment a draft regulatory analysis (ADAMS Accession No. ML22007A009). The staff developed the regulatory analysis to assess the value of revising RG 1.163 as well as alternative courses of action.

III. Backfitting, Forward Fitting, and Issue Finality

Issuance of DG-1391, if finalized, would not constitute backfitting as defined in 10 CFR 50.109, "Backfitting," and as described in NRC Management Directive (MD) 8.4, "Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests"; would not constitute forward fitting as that term is defined and described in MD 8.4; or affect the issue finality of any approval issued under 10 CFR part 52, "Licenses, certifications, and approvals for nuclear power reactors." As explained in DG-1391, applicants and licensees would not be required to comply with the positions set forth in DG-1391.

IV. Submitting Suggestions for Improvement of Regulatory Guides

A member of the public may, at any time, submit suggestions to the NRC for improvement of existing RGs or for the development of new RGs. Suggestions can be submitted on the NRC's public website at <https://www.nrc.gov/reading-rm/doc-collections/reg-guides/contactus.html>. Suggestions will be considered in future updates and enhancements to the "Regulatory Guide" series.

Dated: November 10, 2022.
