ACTION: Notice of availability; request for comments.

SUMMARY: BOEM announces the availability of the draft environmental impact statement (DEIS) for the construction and operations plan (COP) submitted by Empire Offshore Wind, LLC (Empire Wind) for its proposed Empire Wind Project (Project) offshore New York. The DEIS analyzes the potential environmental impacts of the Project as described in the COP (the proposed action) and the alternatives to the proposed action. This notice of availability (NOA) announces the start of the public review and comment period, as well as the dates and times for public hearings on the DEIS. After BOEM holds the public hearings and addresses comments provided, BOEM will publish a final environmental impact statement (EIS). The EIS will inform BOEM's decision whether to approve, approve with modifications, or disapprove the COP.

DATES: Comments must be received no later than January 17, 2023. BOEM will conduct three virtual public hearings. BOEM's virtual public hearings will be held at the following times (eastern time).

SUPPLEMENTARY INFORMATION:

Proposed Action: Empire Wind seeks approval to construct, operate, and maintain the Project: two wind energy farms and their associated export cables on the Outer Continental Shelf (OCS) offshore New York. The Project would be developed within the range of design parameters outlined in the Empire Wind COP, subject to applicable mitigation measures. Empire Wind proposes to develop the lease area in two wind farms, known as Empire Wind 1 (EW 1) and Empire Wind 2 (EW 2) (collectively, the Project). EW 1 and EW 2 will be electrically isolated and independent from each other. Empire Wind proposes to construct and operate up to 147 wind

turbines and up to 2 offshore substations with 2 cable routes under the terms of Renewable Energy Lease OCS–A 0512. The lease area is located 14 miles from Long Island, New York, and 19.5 miles from Long Branch, New Jersey. The onshore components of the Project will include up to three export cable landfall areas in New York (one for EW 1 and up to two for EW 2) and two onshore substations. The EW 1 onshore substation will be in Brooklyn, New York; and the EW 2 Onshore Substation A in Oceanside, New York, or the EW 2 Onshore Substation C in Island Park, New York.

Alternatives: BOEM considered 30 alternatives when preparing the DEIS and carried forward 7 alternatives for further analysis in the DEIS. These seven alternatives include six action alternatives and a no action alternative. BOEM rejected 23 alternatives because they did not meet the purpose and need for the proposed action or did not meet screening criteria, which are presented in DEIS appendix C. The screening criteria included consistency with law and regulations; technical and economic feasibility; environmental impact; and geographic considerations.

Availability of the DEIS: The DEIS, Empire Wind COP, and associated information are available on BOEM's website at: <https://www.boem.gov/renewable-energy/state-activities/empire-wind>. BOEM has distributed digital copies of the DEIS to all parties listed in DEIS appendix K, which also includes the location of all libraries receiving a copy. If you need a flash drive or paper copy, BOEM will provide one upon request, as long as copies are available. You may request a flash drive or paper copy of the DEIS by calling (703) 787–1520.
