

### Annual Burden Hours

In the current information collection, the estimated annual burden is 110 hours. To estimate the annual burden hours for this collection, the CISA multiplied the number of annual respondents by the estimated time burden of 0.1667 hours (10 minutes), for an estimated annual burden of 91.67 hours (*i.e.*, 0.1667 hours multiplied by 550 annual respondents).

### Total Annual Burden

To estimate the total annual burden, CISA multiplied the annual burden of 24,879 hours by the average loaded hourly wage rate computer and information systems managers of \$110.66<sup>1</sup> per hour. Therefore, the total annual burden cost for the collection is \$10,144 (91.67 hours × \$110.66). For the three-year period for which this collection will be approved, the total cost burden would be \$6,603,456 (\$2,201,152 annual cost multiplied by 3 years).

This is a revised information collection.

OMB is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (*e.g.*, permitting electronic submissions of responses).
