Abstract: Under the Resource Conservation and Recovery Act (RCRA), as amended, Congress directed EPA to implement a comprehensive program for the safe management of hazardous waste. The core of the national waste management program is the regulation of hazardous waste from generation to transport to treatment and eventual disposal, or from "cradle to grave." Section 3001(d) of RCRA requires EPA to develop standards for small quantity generators. Section 3002 of RCRA states, among other things, that EPA shall establish requirements for hazardous waste generators regarding recordkeeping practices. Section 3002 also requires EPA to establish standards on appropriate use of containers by generators. Finally, Section 3017 of RCRA specifies requirements for individuals exporting hazardous waste from the United States, including a notification of the intent to export, and an annual report summarizing the types, quantities, frequency, and ultimate

destination of all exported hazardous waste.

Form Numbers: None.

Respondents/affected entities: Private business or other for-profit.

Respondent's obligation to respond: Mandatory (40 CFR part 262 and 265).

Estimated number of respondents: 393,049.

Total estimated burden: 526,035 hours per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$42,607,731 (per year), which includes \$72,394 in annualized capital or operation & maintenance costs.
