

our estimate of the average burdens per response reported in table 2 on our experience with the existing FALCPA petition process. We estimate that a petition would take, on average, 100 hours to develop and submit.

The burden of a notification involves collecting documentation that a food ingredient does not pose an allergen risk. Either we can make a determination that the ingredient does not cause an allergic response that poses a risk to human health under a premarket approval or notification program under section 409 of the FD&C Act (21 U.S.C. 348), or the respondent would submit scientific evidence demonstrating that the ingredient when manufactured as described does not contain allergenic protein. Based on the existing FALCPA notification process, we estimate that the average time to prepare and submit a notification for sesame is approximately 68 hours. Thus, the total annual reporting burden would be 168 hours over the next 3 years.
