²Best abundance estimate. For most taxa, the best abundance estimate for purposes of comparison with take estimates is considered here to be the model-predicted abundance (Roberts *et al.*, 2016). For those taxa where a density surface model predicting abundance by month was produced, the maximum mean seasonal abundance was used. For those taxa where abundance is not predicted by month, only mean annual abundance is available. For the Rice's whale and killer whale, the larger estimated SAR abundance estimate is used.

³ The final rule refers to the GOM Bryde's whale (*Balaenoptera edeni*). These whales were subsequently described as a new species, Rice's whale (*Balaenoptera ricei*) (Rosel *et al.*, 2021).

⁴Modeled take of 1 decreased to zero. For rough-toothed dolphin, use of the exposure modeling produces results that are smaller than the average GOM group size (*i.e.*, estimated exposure value of 1, relative to assumed average group size of 14) (Maze-Foley and Mullin, 2006). NMFS' typical practice is to increase exposure estimates to the assumed average group size for a species in order to ensure that, if the species is encountered, exposures will not exceed the authorized take number. However, given the very short survey duration and small estimated exposure value NMFS has determined that is unlikely the species would be encountered at all. As a result, in this case NMFS has not authorized take for this species.

⁶ Modeled take of 7 increased to account for potential encounter with group of average size (Maze-Foley and Mullin, 2006). ⁶ Modeled take of less than 0.5 was rounded down to zero.

Based on the analysis contained herein of Echo's proposed survey activity described in its LOA application and the anticipated take of marine mammals, NMFS finds that small numbers of marine mammals will be taken relative to the affected species or stock sizes and therefore is of no more than small numbers.

Authorization

NMFS has determined that the level of taking for this LOA request is consistent with the findings made for the total taking allowable under the incidental take regulations and that the amount of take authorized under the LOA is of no more than small numbers. Accordingly, we have issued an LOA to Echo authorizing the take of marine mammals incidental to its geophysical survey activity, as described above.

Dated: December 2, 2022.

Kimberly Damon-Randall,

Director, Office of Protected Resources, National Marine Fisheries Service. [FR Doc. 2022–26568 Filed 12–6–22; 8:45 am] BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648-XC595]

Marine Mammals; File No. 27029

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application.

SUMMARY: Notice is hereby given that Echo Pictures Ltd., c/o Offspring Films, 1st & 2nd floor, Dock House, Welsh Back, Bristol, United Kingdom, BS1 4SB, has applied in due form for a permit to conduct commercial and educational photography on marine mammals.

DATES: Written, telefaxed, or email comments must be received on or before January 6, 2023.

ADDRESSES: These documents are available upon written request via email to *NMFS.Pr1Comments@noaa.gov.*

Written comments on this application should be submitted via email to *NMFS.Pr1Comments@noaa.gov.* Please include File No. 27029 in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request via email to *NMFS.Pr1Comments*@ *noaa.gov.* The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT:

Shasta McClenahan, Ph.D., or Carrie Hubard, (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

The applicant proposes to film up to 24 species of non-listed marine mammals for a wildlife documentary series. Filming may occur on the U.S. east coast from Florida to Maine from platforms including vessels, unmanned aircraft systems, and underwater (snorkelers, divers, and towed, pole, or drop-in cameras). See the application for species and numbers of animals by filming platform. The permit is requested for 2 years.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors. Dated: December 1, 2022.

Amy C. Sloan,

Acting Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.
