**DEPARTMENT OF ENERGY**

**Federal Energy Regulatory Commission**

[Docket No. AC23-6-000]

**Empire Pipeline, Inc.; Notice of Filing**

Take notice that on November 15, 2022, Empire Pipeline, Inc. submitted a request for waiver of the Federal Energy Regulatory Commission's (Commission) requirement to provide its certified public accountant (CPA) certification statement for the 2022 FERC Form No. 2 on the basis of the calendar year ending December 31.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of

intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://ferc.gov>) using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID-19), issued by the President on March 13, 2020. For assistance, contact FERC at [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov) or call toll-free, (888) 208-3676 or TTY, (202) 502-8659.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

*Comment Date:* 5 p.m. Eastern Time on January 5, 2023.

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Project No. 15280-000]

#### Stonecat Hydro, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On June 9, 2022, Stonecat Hydro, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility the Lower Swanton Dam Hydroelectric Project No. 15280 (project), to be located on the Missisquoi River in the Town of Swanton, Franklin County, Vermont. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) an existing dam (Swanton Dam) that includes: (a) a west abutment that includes two 8-foot-long, 8-foot-high wooden headgates; and (b) an approximately 330-foot long spillway that would be retrofitted with: (i) 2-foot-high flashboards with a crest elevation of 110.0 feet mean sea level (msl) at the top of the flashboards; and (ii) a new 60-foot-long, 100-foot-wide reinforced concrete powerhouse at the east end of the spillway that includes three 283-kilowatt (kW) turbine-generator units, with a total installed capacity of approximately 850 kW; (2) an impoundment with a surface area of approximately 180 acres at an elevation of 110 feet msl; (3) a new 60-foot-long, 100-foot-wide intake structure that includes a reinforced concrete forebay and trashrack upstream of the new powerhouse; (4) a new 150-foot-long, 60-foot wide bedrock and reinforced concrete tailrace; (5) a new 12.47-kilovolt transmission line that would connect the turbine-generators to the local distribution grid; (6) a new fish passage facility that would utilize an approximately 300-foot-long, existing canal downstream of the west abutment; (7) an existing parking lot to provide access to project facilities; and (8) appurtenant facilities. The estimated annual generation of the Lower Swanton Dam Hydroelectric Project would be 3,580 megawatt-hours.
