SUPPLEMENTARY INFORMATION:

Background

On October 17, 2022, we published in the *Federal Register* (87 FR 62783–62784, Docket No. APHIS–2021–0078) a notice announcing the availability of a pest risk assessment and a commodity import evaluation document (CIED) relative to the importation into the United States of fresh table grapes from regions of Chile where European grapevine moth (*Lobesia botrana*, or EGVM) is either absent or at very low prevalence. Chile grapes are currently subject to methyl bromide fumigation for EGVM and Chilean false red mite (*Brevipalpus chilensis*). Based on the pest risk assessment and the findings of the CIED, we are also proposing to authorize the importation of grapes from Chile under a systems approach or irradiation for EGVM and *B. chilensis*; current mitigation measures for *Ceratitidis capitata*, or Medfly, would remain unchanged.

Comments on the notice were required to be received on or before December 16, 2022. We are extending the comment period on Docket No. APHIS–2021–0078 until January 17, 2023. This action will allow interested persons additional time to prepare and submit comments.
