

information collection request (ICR) titled “Awardee Lead Profile Assessment (ALPA)” (OMB Control No. 0920–1215; Exp. Date 03/31/2024). The goal of this ICR is to build on the CDC’s existing childhood lead poisoning prevention program. CDC requires that ongoing and new CDC Childhood Lead Poisoning Prevention Programs (CLPPPs), including the FY21 “Childhood Lead Poisoning Prevention and Surveillance of Blood Lead Levels in Children” (CDC–RFA–EH21–2102), complete the ALPA annually. This annual information collection will be used to identify jurisdictional legal frameworks governing CDC-funded childhood lead poisoning programs (CLPPPs) in the United States and strategies for implementing childhood

lead poisoning prevention activities. CDC will use this information to inform guidance, resource development, and technical assistance activities in support of the ultimate goal, which is eliminating lead exposure in children. The dissemination of these ALPA results will ensure that both funded and non-funded jurisdictions are able to: (1) identify policies and other factors that support or hinder childhood lead poisoning prevention efforts; (2) understand what strategies are being used by funded public health agencies to implement childhood lead poisoning prevention activities; and (3) use this knowledge to develop and apply similar strategies to support the national agenda to eliminate childhood lead poisoning. CDC will now use one data collection mode, a web survey. Reporting via email

will be eliminated. This program management survey has been revised in several ways, including the addition of new answer options and questions to understand usage of the updated blood lead reference value (BLRV). The time per response is the same from the 2021 estimate (47 minutes per response) despite revisions to the survey. This updated estimate is based on recent pilot tests of the revised survey among nine respondents, and includes the time needed to review the ALPA Training Manual.

CDC is requesting OMB approval for a total time burden of 59 hours and a total number of 75 respondents per year. These estimates remain unchanged from the previous PRA clearance.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
State or Local Governments (or their bona fide fiscal agents).	ALPA Web Survey	75	1	47/60	59
Total	59

Jeffrey M. Zirger,

Lead, Information Collection Review Office, Office of Scientific Integrity, Office of Science, Centers for Disease Control and Prevention.
