Additionally, the DoD established security audit and accountability policies and procedures which support the safeguarding of PII and detection of potential PII incidents. The DoD routinely employs safeguards such as the following to information systems and paper recordkeeping systems: records are maintained in a secure building in a controlled area accessible only to authorized personnel. Physical entry is restricted by the use of locks, passwords, and administrative procedures, which are changed periodically. The system is designed with access controls, comprehensive intrusion detection, and virus protection. Access to personally identifiable information in this system is role-based and restricted to those requiring the data in the performance of their official duties and completing annual information assurance and privacy training. Records are encrypted during transmission to protect session information, and while not in use (data at rest).
