SUPPLEMENTARY INFORMATION:

I. Summary

The NRC staff has evaluated the environmental impacts of a requested exemption from paragraph 72.106(b) of title 10 of the *Code of Federal Regulations* (10 CFR), which requires the distance from an Independent Spent Fuel Storage Installation (ISFSI) to the ISFSI CAB to be a minimum of 100 meters (the proposed action). This EA has been prepared pursuant to the NRC regulations in 10 CFR part 51, which implement the requirements of the National Environmental Policy Act of 1969. The EA concludes there are no environmental impacts from the proposed action and a FONSI is appropriate. The EA describes the requested exemption by Southern California Edison (SCE) to reduce the CAB to the SONGS perimeter fence line. This exemption will allow the minimum distance from the closest ISFSI storage location to the CAB to be 38 meters on the western (seaward) side and 95 meters on the eastern (landward) side. Since SCE will no longer control

areas beyond its perimeter, SCE will modify post-accident emergency agreements. SCE has agreements with Camp Pendleton, State, and local authorities to remove people from these areas during emergencies such as hostile action, natural disaster, or fire. The reduction of the CAB presents no additional risk to the public and it satisfies a lease condition between SCE and the California State Lands Commission.

The requested exemption is an administrative action and does not involve any construction or ground disturbing activities. The EA evaluated any environmental impacts including impacts to occupational health and impacts from potential acts of terrorism. The NRC has concluded that there are no impacts to land, air, or water resources. The probability of a significant radioactive release caused by a terrorist attack remains very low, and the potential health and land contamination effects of the most severe plausible attack would not be altered by the proposed CAB as compared to the existing CAB.

II. Finding of No Significant Impact

Based on its review of the proposed action, in accordance with the requirements in 10 CFR part 51, the NRC staff has concluded that the requested exemption to the ISFSI CAB boundary will not have a significant environmental impact as discussed in the EA and will not significantly affect the quality of the environment. Therefore, the NRC staff has determined, pursuant to 10 CFR 51.31, that preparation of an environmental impact statement is not required for the proposed action and a FONSI is appropriate.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–96556; File No. SR–NYSE–2022–57]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Increase Certain Annual Listing Fee Set Forth in Section 902.03 of the NYSE Listed Company Manual

December 21, 2022.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 (“Act”)² and Rule 19b–4 thereunder,³ notice is hereby given that on December 16, 2022, New York Stock Exchange LLC (“NYSE” or the “Exchange”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Section 902.03 of the NYSE Listed Company Manual (the “Manual”) to amend certain of its annual fees charged to listed issuers. The proposed rule change is available on the Exchange’s website at www.nyse.com, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend certain of its annual fees charged to listed issuers as set forth in Section 902.03 of the Manual. The proposed changes will take effect from the beginning of the calendar year commencing on January 1, 2023. The proposed increases in the annual fees reflect increases in the costs the Exchange incurs in providing services to listed companies on an ongoing basis, as well as increases in the costs of conducting its related regulatory activities. As described below, the Exchange proposes to make the proposed fee increases to better reflect the Exchange’s costs related to listing equity securities and the corresponding value of such listing to companies.

The annual fee for each class of equity security listed on the Exchange is equal to the greater of the minimum fee or the fee calculated on a per share basis.

The Exchange currently charges an annual fee of \$0.00117 per share for each of the following: a primary class of common shares (including Equity Investment Tracking Stocks); each additional class of common shares (including tracking stock); a primary class of preferred stock (if no class of common shares is listed); each additional class of preferred stock (whether primary class is common or preferred shares); and each class of warrants or rights. The Exchange proposes to change the per share annual fee for the foregoing classes of securities from \$0.00117 per share to \$0.001215 per share.

The current minimum annual fee for a primary class of common shares (including Equity Investment Tracking Stocks) or a primary class of preferred stock (if no class of common shares is listed) is \$74,000. The Exchange proposes to change this minimum annual fee from \$74,000 to \$80,000.

Notwithstanding the fact that the Exchange proposes to increase the per share fee rate applicable to all classes of equity securities set forth in Section 902.03, the Exchange does not propose to increase the minimum annual fees charged for additional classes of common shares (including tracking stocks), preferred stocks that are not the primary listed equity security, or warrants or rights. The Exchange believes that the benefits issuers receive in connection with those listings are consistent with the current minimum fee levels, as those types of listings do
