Cash Deposit Requirements

The following cash deposit requirements will be effective for all shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review, as provided by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for each company listed above will be equal to the weighted-average dumping margin established in the final results of this review for the 2020–2021 POR, except, if that rate is *de minimis*, then the cash deposit rate will be zero; (2) for previously reviewed or investigated companies not listed in the final results of this review, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding; (3) if the exporter is not a firm covered in this review or another completed segment of this proceeding, but the producer is, then the cash deposit rate will be the rate established for the most recently completed segment of this proceeding for the producer of the merchandise; and (4) if neither the exporter nor the producer is a firm covered in this or any previously completed segment of this proceeding, then the cash deposit rate will be the all-others rate of 7.36 percent that was established in the LTFV investigation.²² These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during the 2019–2020 POR and the 2020–2021 POR. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

We are issuing and publishing this notice in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.213 and 351.221(b)(4).

² Enriched ¹⁵N ammonium sulfate is a compound commonly used in laboratory research and quantitative proteomics. It is incorporated into metabolically active cells and small organisms or post-metabolically in peptides and proteins by enzymatic or chemical reactions. The ¹⁵N labels are used to monitor specific aspects of dynamic proteomes. The chemical formula for CIL's enriched Ammonium Sulfate is (15NH₄)₂SO₄. The product's tariff classification under the Harmonized Tariff Schedule of the United States (HTSUS) is 2845.90.0000.

³ Anker's T8700 eufyCam security solar panel is a discrete, weatherproof outdoor panel specifically manufactured for compatibility and use with eufy's outdoor home security camera system. The panel provides total maximum output of 2.6 Watts. The solar panel is encased in laminated material without stitching. The dimensions of the solar panel inclusive of the bezel are 7.31 × 4.56 × 1 inches. The unit weighs approximately 0.69 pounds. Notification to Interested Parties

This list of scope ruling applications is not an identification of scope inquiries that have been initiated. In accordance with 19 CFR 351.225(d)(1), if Commerce has not rejected a scope ruling application nor initiated the scope inquiry within 30 days after the filing of the application, the application will be deemed accepted and a scope inquiry will be deemed initiated the following day—day 31.⁶ Commerce’s practice generally dictates that where a deadline falls on a weekend, Federal holiday, or other non-business day, the

does not have a built-in inverter. The unit is manufactured in China with solar cells that are manufactured in China. The product’s tariff classification under the HTSUS is 8501.71.0000.

⁴ The Mobile Utility Fan has wheels in order to maneuver the fan into a proper location to be used in connection with workshop/DIY/home projects. It also has ancillary features such as a light-emitting diode light, a tray, an electrical power strip, and a one-inch thick round bar that folds down three inches off the ground to hold lightweight tools and items and carry them to and from a job site. The fold down round bar does not have a toe plate and is not capable of sliding under a load for purposes of moving or lifting a load. It is manufactured using mainly steel parts. The product’s tariff classification under the HTSUS is 8414.51.9090.

⁵ The product is a heat sink manifold, which is a component part to Wagner’s paint sprayers. The manifold controls the flow of paint in the sprayer and is a heat sink, drawing heat away from the motor and electronic components. The heat sink manifolds are produced using Chinese-origin Series 6 aluminum alloy that is extruded into blanks and then precision machined to custom dimensions, flatness, and quality to achieve the desired specifications for heat dissipation. The product’s tariff classification under the HTSUS is 8424.90.9080, as parts of sprayers.

⁶ In accordance with 19 CFR 351.225(d)(2), within 30 days after the filing of a scope ruling application, if Commerce determines that it intends to address the scope issue raised in the application in another segment of the proceeding (such as a circumvention inquiry under 19 CFR 351.226 or a covered merchandise inquiry under 19 CFR 351.227), it will notify the applicant that it will not initiate a scope inquiry, but will instead determine if the product is covered by the scope at issue in that alternative segment.

appropriate deadline is the next business day.⁷ Accordingly, if the 30th day after the filing of the application falls on a non-business day, the next business day will be considered the “updated” 30th day, and if the application is not rejected or a scope inquiry initiated by or on that particular business day, the application will be deemed accepted and a scope inquiry will be deemed initiated on the next business day which follows the “updated” 30th day.⁸

In accordance with 19 CFR 351.225(m)(2), if there are companion AD and CVD orders covering the same merchandise from the same country of origin, the scope inquiry will be conducted on the record of the AD proceeding. Further, please note that pursuant to 19 CFR 351.225(m)(1), Commerce may either apply a scope ruling to all products from the same country with the same relevant physical characteristics, (including chemical, dimensional, and technical characteristics) as the product at issue, on a country-wide basis, regardless of the producer, exporter, or importer of those products, or on a company-specific basis.

For further information on procedures for filing information with Commerce through ACCESS and participating in scope inquiries, please refer to the Filing Instructions section of the Scope Ruling Application Guide, at https://access.trade.gov/help/Scope_Ruling_Guidance.pdf. Interested parties, apart from the scope ruling applicant, who wish to participate in a scope inquiry and be added to the public service list for that segment of the proceeding must file an entry of appearance in accordance with 19 CFR 351.103(d)(1) and 19 CFR 351.225(n)(4). Interested parties are advised to refer to the case segment in ACCESS as well as 19 CFR 351.225(f) for further information on the scope inquiry procedures, including the timelines for the submission of comments.

Please note that this notice of scope ruling applications filed in AD and CVD proceedings may be published before any potential initiation, or after the initiation, of a given scope inquiry based on a scope ruling application identified in this notice. Therefore, please refer to the case segment on ACCESS to determine whether a scope ruling application has been accepted or
