Title; Associated Form; and OMB Number: Vessel Operation Report; ENG Forms 3926, 3925, 3925B, 3925C, and 3925P; OMB Control Number 0710-0006.

Needs and Uses: The information collection requirement is necessary to determine usage on the nation's waterway network. The WCSC and the LPMS databases are the sole government sources for information in the United States on domestic waterborne commerce and lock or canal operation. The Army Corps of Engineers is the agency charged with the collection of this data due to its responsibility for the planning, design, construction, rehabilitation, operation, and maintenance of the inland waterway systems, the Great Lakes, and the channels of the coastal ports.

The aggregate data collected under these programs are published in the annual publications, *Waterborne Commerce of the United States, Parts 1-5*, *Lock Performance Monitoring System Quarterly Reports*, and *Waterborne Transportation Lines of the United States*. Each database and publication provide essential information for an understanding of the utilization of our Nation's navigation systems and the fleet using these systems. The data bases provide essential information to those with the responsibilities over the physical system or to those involved in shipping or moving commodities on the Nation's waterways." [River and Harbor Act of September 22, 1922 (42 Stat. 1043)].

Affected Public: Individuals or households.

Annual Burden Hours: 10,080.

Number of Respondents: 840.

Responses per Respondent: 12.

Annual Responses: 10,080.

Average Burden per Response: 1 hour.

Frequency: On occasion.

The end result of using both the ENG Form 3925 series and ENG Form 3926, despite collecting very similar data, is to ensure WCSC is able to paint a complete picture of vessel movements and cargo

carried on U.S. waterways. Each set of data produced from the forms allows WCSC to ensure accuracy and completeness. The data are used to annually publish *Waterborne Commerce of the United States (WCUS) Ports and Waterways*, which presents detailed data on the movements of vessels and commodities at the ports and harbors and on the waterways and canals of the United States and its territories. It also provides statistics on the foreign and domestic waterborne commerce moved through the U.S. waters. Congress receives this annual report, and the data contained therein are used in cost-benefit analyses for new projects, rehabilitation projects, and operations and maintenance of existing projects. It is also used by other Federal agencies involved in transportation and security. Researchers and private organizations also use the data regularly to help decide on which locales are best models for their studies/needs.

Alternate OSD Federal Register Liaison Officer, Department of Defense.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Qualitative Data Collection on Access to Food on and Near Military Installations; OMB Control Number 0704–AFMI.

Type of Request: New.
Number of Respondents: 360.
Responses per Respondent: 1.
Annual Responses: 360.
Average Burden per Response: 40 minutes.

Annual Burden Hours: 240 hours.
Needs and Uses: The Military Community & Family Policy (MC&FP) within the DoD's Office of the Deputy Assistant Secretary of Defense is requesting Office of Management and Budget clearance for Qualitative Data Collection on Enlisted Service Member Access to Food on or Near Military Installations. This collection of information is necessary for MCFP to collect qualitative data through interviews and/or focus groups with Enlisted Active Duty Service members and spouses of Enlisted Active Duty Service members to understand the eating and spending patterns of the Enlisted military. Survey data has shown that 24% of the Active Duty Force report some level of food insecurity; the prevalence is higher in the Enlisted population and higher for those who live on-base than off-base. Similar data patterns were seen in the Active Duty Spouse Survey. At this time, little is known about the underlying causes of higher rates of food insecurity in the military, especially as it pertains to those who experience food insecurity while living on a base with dining facilities. Qualitative data collection will allow the DoD to collect data that will inform targeted initiatives to reduce food insecurity. Data collection will address the access to nutritious food and financial management of Service members and spouses' financial management practices.

Affected Public: Individuals or households.

Frequency: Once.

Respondent's Obligation: Voluntary.
