### Federal Railroad Administration

[Docket Number FRA–2008–0161]

#### Petition for Extension of Waiver of Compliance

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that by letter dated November 29, 2022, Alaska Railroad Corporation (ARRC) petitioned the Federal Railroad Administration (FRA) for an extension of a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 238 (Passenger Equipment Safety Standards). The relevant FRA Docket Number is FRA–2008–0161.

Specifically, ARRC requests to extend its relief from § 238.303, *Exterior calendar day mechanical inspection of passenger equipment*, and § 238.313, *Class I brake test*, for its Hurricane Turn passenger train equipment, consisting of two locomotives, three passenger coaches, and one baggage car. ARRC states that the requirement for a qualified maintenance person (QMP) to complete the inspections would cause hardship, as “there is not enough work to support a [QMP] position” in Talkeetna, Alaska, where the equipment is stored, and the nearest QMP would have to drive 224 miles each day from Anchorage, Alaska. This equipment is operated in seasonal service five days a week, one round trip per day, between Talkeetna, Alaska, and Hurricane Gulch Bridge, Alaska.

#### Petition for Waiver of Compliance

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that by letter dated December 7, 2022, Virginia & Truckee Railroad Company (VTRR) petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR 230.17, *One thousand four hundred seventy-two (1472) service day inspection*. FRA assigned the petition Docket Number FRA–2022–0081.<sup>1</sup>

Specifically, VTRR requests relief for steam locomotive VTRR 29, which is used in public tourist excursions in

<sup>1</sup> VTRR initially petitioned for this relief by letter dated August 25, 2022. See <https://www.regulations.gov/document/FRA-2022-0081-0001>. On October 5, 2022, VTRR withdrew the August 25, 2022, petition in this docket. See <https://www.regulations.gov/document/FRA-2022-0081-0005>.

Virginia City, Nevada, in a National Historic District. Regarding the locomotive's 1472 service day inspection, VTRR requests to extend the period in which the inspection is due from June 11, 2023, to December 31, 2023, by which time VTRR 29 will have accumulated fewer than 1,200 service days. In support of its request, VTRR states that its railroad is insular, and the relief will help VTRR "make up for lost operating days due to the mandated shut town of [the] business and the detrimental effects of the pandemic to [the] company and to [the] community." VTRR adds that VTRR 29 received a new dry pipe in 2021 during an inspection of its boiler interior, and both interior and exterior boiler inspections were performed at each annual inspection since 2008. VTRR also states it "exercises complete control of the operation, inspection, maintenance, and repairs" of VTRR 29.
